

Seniors who plan to pursue post-secondary education after graduation are encouraged to take rigorous senior courses. To help seniors prepare for a college schedule, students who take a rigorous course load have the option of flexible scheduling and may not be required to schedule a course for all 8 periods of a traditional CGHS schedule. Seniors are always welcome to take additional electives and remain at CGHS for all periods.

To qualify, students must meet the following requirements:

- Be on track to earn a college prep diploma or seal, such as an Academic Honors Diploma, an Enrollment Honors Seal, or an Enrollment Honors Plus Seal.
- Obtain a 3.0 or higher GPA prior to the start of senior year.
- Earn at least 40 credits prior to the start of senior year.
- Follow all school policies and procedures, including timely completion of all required senior College and Career Readiness activities (Career Discovery meeting, completion of FAFSA or FAFSA waiver form)
- Seniors will be assigned a STAR and will have mandatory programming at various times throughout the year.
- If pulled for AIM, students must attend.
- During senior year, enroll in four in-house CGHS-qualified courses from the list below
- Maintain academic proficiency in the qualified courses. Failure to maintain a C or higher in semester 1 will result in the loss of flex scheduling for semester 2.
- Maintain attendance rates. Missing five (5) or more days in semester 1 may result in the loss of flex scheduling for semester 2.
- Parents/Guardians must sign an agreement allowing the student to have a flex schedule and leave the school grounds

NOTE: Athletes and co-curricular students must earn 5 credits each semester to maintain IHSAA/academic eligibility.

Flex Qualifying Courses

Course	Type	Department
Art History	AP	Art
Computer Science Principles	AP	Business
Computer Science A	AP	Business
English Language and Composition	AP	English
English Literature and Composition	AP	English
Statistics	AP	Math
Calculus AB	AP	Math
Calculus BC	AP	Math
Biology	AP	Science
