

Steel City Codefest 2014

Team Classifieds

If you are looking for a team or additional team members, please include a description of your need, or your skill set, and your email below so that other participants can contact you.

Please note: **Ticketing is closed.**

If you are a Python/Django developer, please contact raghavev@tepper.cmu.edu
We are looking for you :)

I'm an iOS developer looking for a team. Check out my stuff at <http://michael-deasy.com>. Let's make something cool that can actually make someone's day better.

mikewdeasy@gmail.com

I am a java/j2ee developer, I wanna join any group where I can contribute effectively. Please reach me on pratibha.shambhangoudr@gmail.com

I am a jack-of-all-trades-master-of-none with experience in .NET and web coding technologies as well as product "thought" leadership. I'm interested in joining as a team member, but would be considered a rookie at this type of event. If interested, please email me at rh130sb@hotmail.com

Looking to join a group for codefest. I'm currently getting my MSIS at Pitt's iSchool. I have taken classes in Java, PHP, C, HTML. Currently, I'm taking a Mobile GIS and Location Based Services class where we'll be programming on Android and working with Google Maps API. Please let me know if you're interested in me joining your group. Please email me at clk93@pitt.edu

Looking to join a group for codefest. I am student at Carnegie Mellon University. I have developed web applications in Django, Java, and Ruby on Rails. I have some front-end experience. My background is in algorithms and machine learning, so if you are interested in developing a data-driven, please contact me at mnandi92@gmail.com

I'm looking for a group for Codefest. I have experience in coding / building websites. Little experience in Android App development. First time in participating in this kind of event, but willing to help. please email me at Lstrong023@gmail.com

We are a nonprofit organization interested in designing an app that will help citizens share their ideas for redevelopment in their neighborhood, specifically on vacant lots. We are looking to work with coders familiar with mobile app development. Our current team has marketing/communications and community outreach/ organizing experience. Please email Sara,

s.innamorato@gtechstrategies.org

Andrew Somerville: I'm a software engineer with > 10 years experience currently responsible for keeping a live web app running. I'm quite familiar with Python and come with experience in Django. Familiar with Javascript, HTML, and CSS as well as AWS. I also have very strong math skills especially matrix algebra, kinematics, and geometry. I'm also knowledgeable in the guts of linux. If you are looking for a team member with my skillset, contact me at

andy.somerville@gmail.com
