[b]Tips dari abg2 OTAI[/b]

[quote=H4XF4XTOR,Jul 18 2013, 01:58 PM]aku xdak hero favorite la.
ko tanya la amein ke sapa2 yg pernah main dgn aku.start game je aku amik random?

why?

apa gunanya main game kalau x dpt experience semua character ye x? plus dari situ ko tahu setiap hero apa skill dan dari situ gaklah ko boleh belajar nak counter hero tu cmne also secara x langsung finally nanti ko akn perasan "banyak2 hero ni,hero ni paling sesuai untuk situasi ini ini ini yadi yada lebih kurang gitu la"

kadang2 aku dpt dazzle,kadang2 aku dapat pugna,kadang2 aku dapat antimage etc.

so belajarlh semua hero kalau boleh....dah rasa semua hero then ko nak pick ko punya favorite,ko punya hal lah :D

[quote=red4900,Jul 18 2013, 02:00 PM]TI tahun ni msti sama cam tahun lepas. dari tengah malam sampai tengah hari. ingat lagi tahun lepas aku apply cuti hari isnin tu sbb nak tengok wakakakaka

LGD mmg camtu. cam robot. tapi bila team dah tau camne nk handle diorg, kalah aa. Mushi sucks late game. haha

Tips nak guna carry yg fragile xde disable: (drow/clinkz/etc)

- selagi mana xleh solo kill, xyah mengade nak pegi 1v1
- in team fights, jgn jadi the first yg engage. biar org lain dlm team yg kena focus fire, korg xleh mati dulu. korg damage dealer. biar tank yg tank, korg yg damage.
- early game survivability is priority.
- selalu bawa TP early-mid game. pandai lari dari gank.

[b]Useful Console Command[/b]

To set console mode

- 1) In steam, right click on "Dota 2" and click on properties
- 2) Click on Set Launcher Options and type in: -console
- 3) Press OK and enter the game, to remove the console from view press the ` key.

Commands

[spoiler][i]dota_minimap_hero_size 700[/i] - will make the size of the hero dot on the minimap as big as you want. Default = 600.

[i]dota_disable_range_finder 0[/i] - by default you only see the range of spells when you hover your mouse on the spell icon. With this set to 0 it will show you the range when you actually click to use the spell on someone. Default = 1.

[i]dota_always_show_player_names[/i] - 0 will disable, 1 will enable player name on top of health bars. Default = 0.

[i]dota_hud_healthbars[/i] - 1 will make your health smoother without the lines you see on health bars (the blocks in the health that divides at around 200 life per block). 3 will enable it back on and 0 will make all health bars disappear, the others do nothing apparently. Default = 3.

[i]dota_unit_use_player_color[/i] - As the command suggests, it colors it player either individually or an unified color by team. 1 Enables individual colors, 0 Team color. Default = 1.

[i]

dota_player_units_auto_attack[/i] - This is in the settings, but I find it too darn useful. 0 Will stop auto-attacking and only attacks IF you click to attack, whereas 1 will auto-attack at all possible times. Default = 1

[i]dota_force_right_click_attack 1[/i] - **[color=red]**This will enable right click deny!!!!!!!!!!!!**[/color]**

[i]net_graph[/i] - 1 show ping, FPS etc on game window or

[i]cl_showfps[/i] 1

*net_graphpos from 1 to 50 to change graph position
