

Grade 10 – Trigonometry

*Intent of this rubric is for you to communicate where you feel your strengths and weaknesses are within the learning outcomes of the Trigonometry Unit.

M04 Students will be expected to develop and apply the primary trigonometric ratios (sine, cosine, tangent) to solve problems that involve right triangles.				
	4 In-Depth	3 Competent	2 Developing	1 Limited
I can label the sides of a right triangle for opposite, adjacent and hypotenuse.				
I can solve an unknown angle in a right triangle.				
I can solve a missing side in a right triangle.				
I can solve a right triangle. (all sides and all angles)				
I can solve a problem that involves one or more right triangles by applying the primary trigonometric ratios or the Pythagorean theorem.				
Overall Self Assessment in Trigonometry				

NOTES:
