

Subsurface Questions

When did you first hear about Subsurface?

When Google announced GSoC 2014 mentoring organizations.

Do you have any diving experience? (this is not essential, we have devs that are not divers)

I had basic diving training for SSI certification when I was age 15, but haven't got one due to organizer reasons.

What attracted you to Subsurface?

Opportunity to develop iOS application from scratch for community that clearly knows what it wants from this App.

What other open-source tools do you use?

Colloquy, Firefox, VLC and a bunch of iOS open-source frameworks.

Describe any participation by you in the Subsurface community (e.g. created tutorials, submitted bug reports, asked or answered questions on mailing lists or IRC).

Checked fix and [notified](#) about it.

Describe any contributions you have made to Subsurface development (e.g. bug fixes, translations, packaging, testing).

[Fixed](#) android App build.

[Fixed](#) "easyfix" issue #433.

In exactly two sentences, why should we pick YOU?

I have:

- experience in iOS applications development (2 years) including all phases from creating *Apple Developer* account to submitting application to *AppStore*;
- JAVA programming background (worked as GWT developer for 1 year).

About Myself

What is your name, email address, and irc nickname?

Andrey Zhdanov

andrjufka@gmail.com

zhdanov

Describe any plans you have for the summer in addition to GSoC (classes, thesis, job, vacation, etc.).

I have part-time job and planning to take vacation on the last week of August.

What programming projects have you completed?

My main project is [Transport LV](#). It has more than 15k downloads (that's pretty much for my small hometown).

What are your favorite programming tools (editor, etc.)?

IntelliJ products (IDEA, AppCode, WebStorm), Xcode.

Describe any work on other open-source projects.

Participated in [GeoReporter](#) iOS project.

List other GSoC projects you are applying to.

I'm interested only in this project. Other GSoC projects that require iOS developers aren't interesting for me as much as this.
