

Sample text for request for extension of comment period:

Your comments can be VERY short and filed as a simple eComment on FERC's website. These are samples, please write in your own words.

Please extend the comment period for Iroquois Pipeline's request for reissuance of their certificate, currently deadlined for March 17, 2026. There needs to be sufficient time to file for affected abutters new to the region since the previous proceeding to file Motions to Intervene.

I am requesting an extension of the March 17th comment deadline to April 15th for Iroquios Pipeline's petition under docket CP13-502-003.

Please extend the comment deadline by another month to allow the public more time to file.

(for people along the pipeline route)

I am directly affected by the proposed Iroquois Pipeline's Wright Interconnect Project and am requesting an extension of the comment period beyond March 17th. Please allow an additional four weeks at minimum.
