

Imperial Sun Party Platform

Ideology

We strive to be to be the forerunners of promoting the interests of eJapan; domestically and abroad. Through unity and stronger foreign relations we will expand eJapan's sphere of influence, and bring about eJapan's long overdue 2nd Golden Age.

Government

Imperial Sun Party supports the government in having a solid foundation that defines the powers of the government. Establishing a constitution, charters, or a combination of both to help define the powers of each branch of the government, giving our citizens an idea on what their government can and cannot do.

We support this kind of foundation so our people can get more involved when they know more about those positions. Establishing checks and balances so one branch does not have too much power over the other. We must continue to learn, amend, and expand these documents to accommodate the changes of our nation and the eWorld.

Military

The Imperial Sun Party (ISP) supports the unity of eJapan’s military through the military charter, supporting the national military units and the militia office. The ISP will not have a private military unit but instead support our members to join the national military.

We the ISP support military action when supporting our allies and defending our homeland, while respecting diplomatic possibilities. We recognize the value and dangers in both PTO and ATO forces, these types of forces are necessary in the eWorld

in the defense of our allies and homeland.

We fight against aggressive wars for economic stimulation, resources, or reasonless hostility; we must defend our homeland and allies against such wars.

Foreign Affairs

We wish to see stronger relations with our neighbors and strengthen eAsia all together, a united region and not another eEurope. We support joining world alliances and to no longer stay neutral.

Economy

We support a purposive and fair economy to all citizens. We value the taxes aimed at financing plan to help the community or military support. The government should also always help to maintain a stable eJapanese market, and help give our citizens the best chance of success.

Culture & History

We support the preservation and expansion of eJapanese culture, hoping to exchange culture with our neighbors, and strengthen our friendships. We also support the documentation of as much history of eJapan as we can in as many aspects as possible. Expanding the Kyushu library and updating eRepublik wiki pages for eJapan is something the ISP hopes to see.
