

At Google for Education, we're interested in learning what makes the schools that use our technology successful. Below you will find some examples of our reference schools as well as the work we have done with some research firms to identify successful schools and write impact portraits about them. We've only begun in Australia, and we're keen to grow these best use case stories!

Ultimately, we believe the more schools we can identify and work hand-in-hand with to evangelise best practices, the more success that will mean for other schools using Google for Education technology in schools across NSW and Australia in the future. We want to work with interested schools and speak directly with your school leaders, curriculum and instruction specialists, and teachers at the forefront of the use of technology.

Particularly we wanted to understand the impact of [G Suite for Education](#) and [Chromebooks](#) in your school.

We are looking for schools who believe they are highly successful using Google for Education technology as well as those just starting the journey, but are proactive and eager to deepen use and understanding.

**If this describes your school, please work with your technology team to complete [this form](#) by June 29th, 2018 so we may reach out!**

Examples of Google for Education Reference and Impact Portrait Schools:

- Google for Education Reference School Profile - [McKinnon Secondary College](#)
- Google for Education Blog - [Impact Portrait Launch](#) (2016)
  - AU Local Example - [McKinnon Secondary College](#)
  - NZ Local Example - [St. Patrick's College](#)
