

SL: Here is something to help grow your list

Hey Adam

I have recently seen your youtube video about the top 5 must have mods for your subaru and it was definitely worth a watch. I can definitely see that translates and helps the Subaru community (your target audience) in figuring out what mods to buy next for their cars mostly off your site.

Also as I was navigating through your site I noticed that you don't have a pop up Opt In page which can definitely help grow your list so more people can see your emails about your latest deals. So I went ahead and made an Opt In page for you that you can put on your site to grow your list, posted in the doc below.

(link)

Let me know what you think and how it performs.

Best regards,
Nostradamus
