

Bibliography of Works by Black, Indigenous, and People of Color in Technical and Professional Communication

Last Updated: May 26, 2024

The purpose of this bibliography of works by Black, Indigenous, and People of Color (BIPOC) in technical and professional communication (TPC) is to amplify the perspectives of BIPOC in the field and to serve as a resource for teachers and researchers, whether for course development, research design, writing, development of comprehensive exam reading lists, or other activities. Although there are several bibliographies centered on issues of diversity, social justice, and anti-racism in TPC (see list below), or that amplify the work of multiply-marginalized scholars, this bibliography focuses on works by BIPOC scholars in TPC. This document was curated by Jennifer Sano-Franchini, Sweta Baniya, and Chris Lindgren of the Working Group to Address Anti-Blackness in Professional and Technical Writing at Virginia Tech. Rebecca Walton, Kristen R. Moore, and Natasha N. Jones' (2019) *Technical Communication After the Social Justice Turn: Building Coalitions for Action*, was consulted in the development of the first iteration of this bibliography.

This resource is a living document, and your contributions are welcome. To recommend corrections, edits, or additions, use the commenting function. For additions to this document, please include an APA formatted citation entry and any keyword tags. We would like to avoid amplifying the works of known abusers and those who have repeatedly made anti-Black or otherwise racist comments in the field, and we ask that you take this concern into consideration as you recommend any new entries. (Because this information tends to get communicated in disciplinary whisper networks, we of course understand that you may not be aware of such information.) If you see the name of an abusive, anti-Black, or otherwise racist scholar on this list, you can let any or all of us know at jennifer.sano-franchini@mail.wvu.edu, lindgren@vt.edu, and baniya@vt.edu.

This bibliography is organized according to the following themes:

- [Artificial Intelligence](#)
- [Communication and UX Design](#)
- [Computer Programming and Code](#)
- [Crisis & Risk Communication](#)
- [Disciplinary Issues](#)
- [Documentation](#)
- [Environmental Rhetoric and Communication](#)
- [Genre in Technical Communication](#)
- [Games in Technical Communication](#)
- [Health & Medical Communication](#)
- [Intercultural Communication](#)
- [Methods & Methodologies](#)
- [Programmatic Issues & Research](#)
- [Race & Ethnicity in Technical Communication](#)
- [Regulatory Writing](#)
- [Scientific Communication](#)
- [Service-Learning & Community Engagement](#)
- [Social Justice in Technical Communication](#)
- [Teaching and Assessing Technical and Business Communication](#)

- [Teamwork and Collaboration](#)
- [Technical Communication Theory](#)
- [Technologies](#)
- [Translation](#)
