FORUM: Environmental Committee

QUESTION OF: Water management in South East Asian countries to overcome damage caused by flooding

MAIN SUBMITTER: Bangladesh

NAME OF COMMITTEE

3 Preambulatory Phrases (look at the Resolution Directions)

- *Noting with deep concern* that on average, 55 million people worldwide are impacted by flooding each year,
- *Fully aware* that floodwaters and debris can cause structural damage to bridges and roadways which can make travel extremely difficult,
- *Keeping in mind* that floods and high amounts of rainfall can lead to soil erosion leading to a decline in crop production,

5 Operations Phrases

- *Requests* for drainage systems to be investigated and improved to prevent major flooding
- *Encourages* plantation of vegetation be more widespread
- *Asks for* assistance from international countries to support southeast asian countries on their flooding crisis
- *Recommends* building more flood proof infrastructure
- *Considers* increasing the amount of flood control structure
