

Exposing: Misael / Blindy / Krilex / Franchu / Thiefxenky
FABICHOLAS & ELFB34 WERE COMPLICIT

Grooming, Leaking, Hacking people accounts & Distribution of CP.

A few notes you might need to know before reading this is:

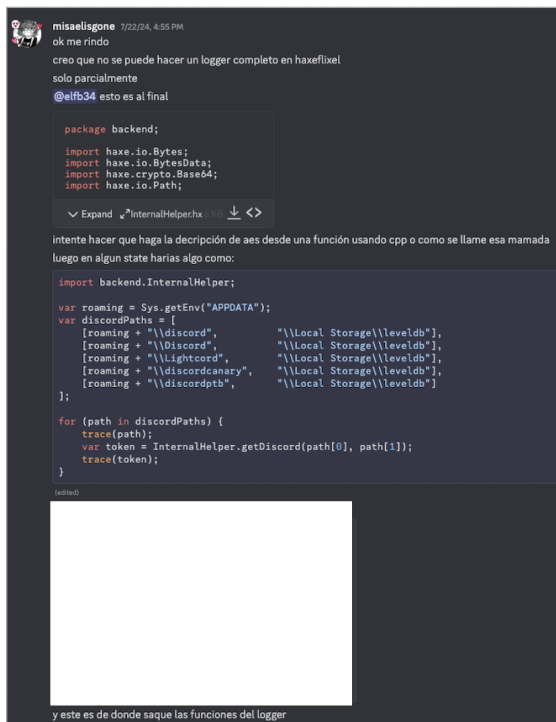

- 1)** This document was prepared with the collaboration of numerous individuals. It compiles testimonies and information gathered both by people directly involved in uncovering parts of the story and by others who found related material by chance. We thank everyone for their patience during the organization process.
- 2)** Most of the content is based on multiple, cross-verified testimonies. However, given recent activity involving Misael's older friend group, we have chosen to keep all contributors and witnesses anonymous to protect their privacy, as some have already faced harassment following the release of related information posted on twitter.
- 3)** We advise against engaging with anyone claiming to represent us or share additional information on our behalf. This document contains our full statement. Any attempt to extend or distort it should be treated as misinformation.
- 4)** We are not affiliated with the accounts [PDFExterminer](#) or [MrSteelBurner](#). While we appreciate their efforts to raise awareness, some of the content they shared includes inaccuracies and biased claims against individuals not involved in the matter. Their actions appear to have ulterior motives that do not align with the intentions of this document.
- 5)** We aimed to provide sufficient context and relevant evidence for each key point while keeping the text as concise and accessible as possible.
- 6)** The only term not explained in full detail here is *Roblox condo*, which refers to a type of server that bypasses Roblox's moderation systems to enable +18 roleplay environments.
- 7)** To avoid confusion, we will refer to the main responsible as Misael, though he is also known by the following aliases:
 - 6Blindy
 - Krilex
 - Franchu
 - Thiefxenky
 - -X
 - Kerubin

Again, We thank you all for your attention and patience.

17BUCKS LEAKS AND HOW FABICHOLAS & ELFB34 WERE INVOLVED:

Originally, during the development of Mexifloor v2 in 2024, Misael attempted to create a token logger intended to act as a “firewall” against anyone who tried to leak or download a developer version of the mod. However, due to his limited coding knowledge at the time, he was unable to complete it. Despite this, the idea remained in his mind, and he eventually asked elfb34 for assistance with it (a detail that will become important later on.)

MISAEAL CODED THE FIRST VERSION OF THE TOKEN LOGGER:

misaelisgone 7/22/24, 4:55 PM
ok me rindo
creo que no se puede hacer un logger completo en haxeflixel solo parcialmente
@elfb34 esto es al final

```
package backend;
import haxe.io.Bytes;
import haxe.io.BytesData;
import haxe.crypto.Base64;
import haxe.io.Path;

intente hacer que haga la decipcion de aes desde una función usando cpp o como se llame esa mamada
luego en algun state harias algo como:
```

```
import backend.InternalHelper;

var roaming = Sys.getenv("APPDATA");
var discordPaths = [
    [roaming + "\\discord", "\\Local Storage\\leveldb"],
    [roaming + "\\Discord", "\\Local Storage\\leveldb"],
    [roaming + "\\Lightcord", "\\Local Storage\\leveldb"],
    [roaming + "\\discordcamary", "\\Local Storage\\leveldb"],
    [roaming + "\\discordptb", "\\Local Storage\\leveldb"]
];

for (path in discordPaths) {
    trace(path);
    var token = InternalHelper.getDiscord(path[0], path[1]);
    trace(token);
}
```

y este es de donde saque las funciones del logger

Translation:

Misael:

"Ok I give up"

"I think I can't make a logger fully on HaxeFlixel"

"only partially"

"@elfb34 this is the final code:"

* *Script to run the token logger*

"I tried to make it give out a description from the function using whatever the variable it's called"

"Then you would just do smth like:"

* *Template of how the code should look for that segment*

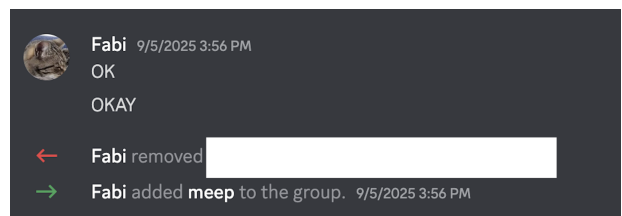

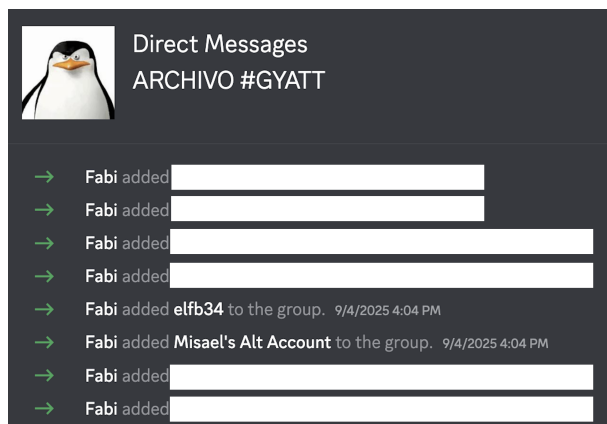

* *The white box hides a link of a github repository that allows users to create code used for grabbing tokens, mainly in Crypto wallets.*

"This is where I got all the logger functions."

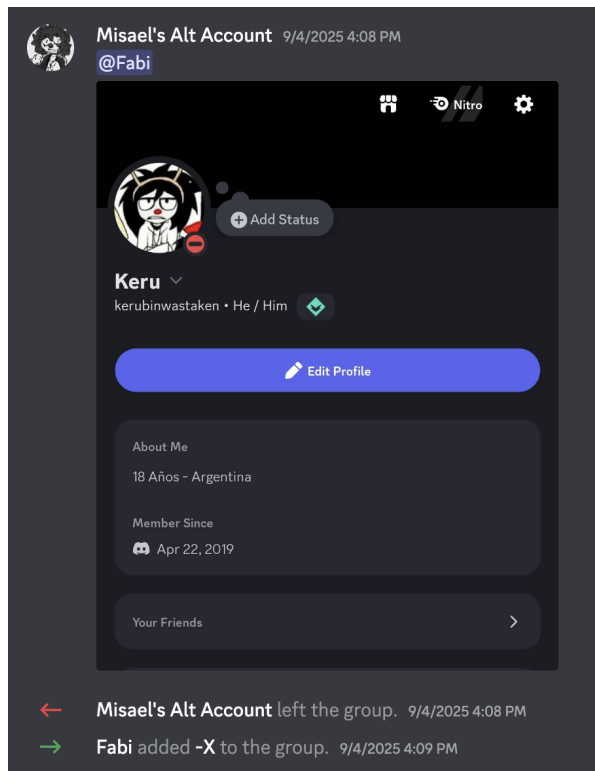

GROUP CHAT:

This entire situation began with a group chat created by Fabicholas on September 9th. He decided to archive an older group he had previously used with friends and replace it with this new one. The chat included his now-boyfriend mrmeep64, Misael, elfb34, and several other individuals whose names will not be disclosed, as they either left the group or were removed by Fabicholas before the leak incident took place.

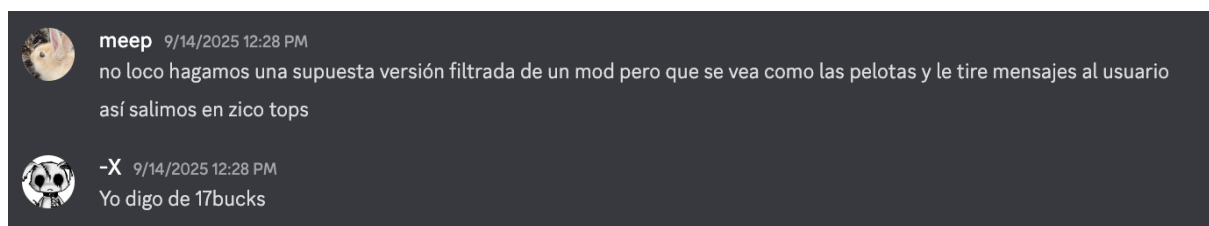

(In other words, these people were not involved in any of the events discussed later in this document.)

Additionally, Misael decided to join the chat using an alternate account under the name "Thiefxenky", or "-X" as his username appeared. However, throughout this document, we will continue referring to him as Misael when quoting his messages.

Some time later, on September 14th, while the group was chatting, mrmeep64 came up with an idea: the group should create a fake version of any mod they wanted, which, once executed by the user, would send them direct messages, making it appear as if the program was "haunted." At that point, Misael suggested using 17bucks as the base for this fake build.

Translation:

mrmeep64:

"No dude We should make a supposedly leaked version of a mod that looks completely real and it should send messages to the User, so we appear on Zico Tops"

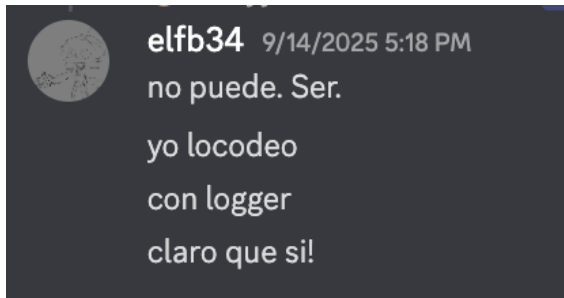

(Spanish Youtuber dedicated to making videos on haunted and paranormal stuff in videogames)

Misael:

"I suggest 17bucks"

INTEGRATION OF THE TOKEN LOGGER.

Later that same day, an idea emerged between Misael and, mainly, elfb34; He brought up the old scrapped token logger they had once attempted to build for Mexifloor, suggesting that they should integrate it into the fake 17bucks build.

Translation:

elfb34:

"No fucking way"

"I'll code it"

"with a logger"

"hell yeah!"

After some time spent brainstorming ideas, the group decided to use Inu's (also known as Doggo or Chud) recreation of 17bucks for their fake build.

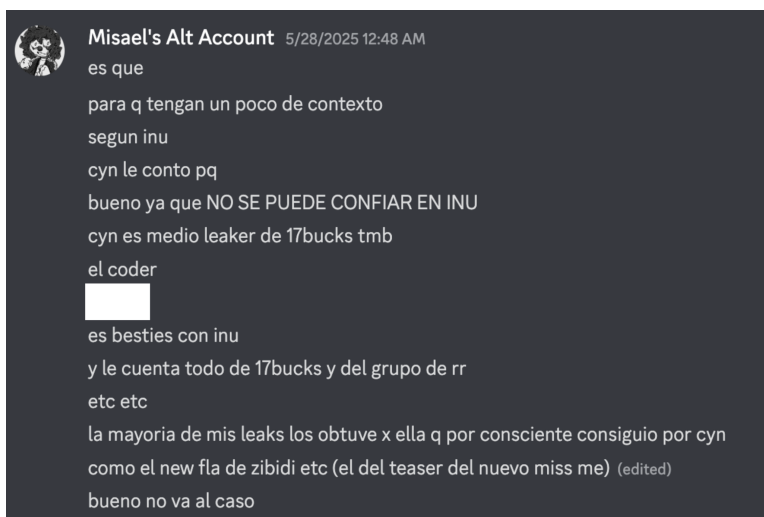

CONTEXT ON WHO IS INU AND WHY SHE'S IMPORTANT:

Inu / Doggo / Chud is a well-known leaker and tracer within the *Friday Night Funkin'* community. She became known for tracing sprites and cutscenes to recreate popular mods, most notably *7quid* and *17bucks*.

After both Inu and Misael were removed from the Mexifloor development team, they maintained close contact. Some testimonies claim that their relationship eventually became romantic, though this cannot be confirmed as there is no solid evidence beyond these testimonies.

Regardless, Inu granted Misael access to all her recreation projects, including her version of 17bucks.

The following screenshot comes from an older conversation where Misael admits that he obtained most of his leaked material from Inu.

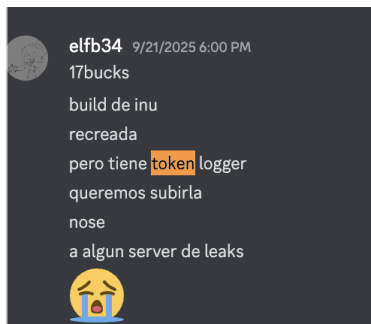

Translation:

Misael:

"The thing is, so you guys have some more context, Inu told me that Cyn is sort of a leaker of bucks, the coder, they are besties with Inu, and he tells her everything about what goes on bucks and RR, etc. etc.

The majority of the leaks I have I got from her and consequently by Cyn, like the new Zibidi FLA, etc. (the one from the New Miss Me teaser), either way that's not the point."

As previously mentioned, the group planned to create a fake version of the 17bucks build, and they ultimately decided to use Inu's recreation, which Misael already had access to. This plan was later confirmed by elfb34 on September 21st, during a voice call within the group chat.

Translation:

elfb34:

"17bucks"

"Inu's build"

"Recreation"

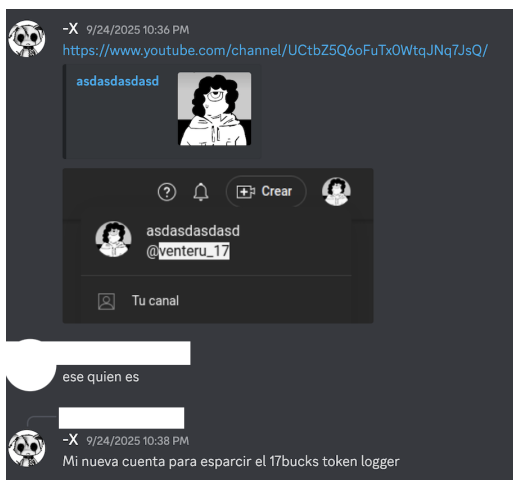

"But it has a token logger"

"We want to upload it to some random server dedicated to leaks"

VENTERU 17 ACCOUNT

The group's plan was to spread their fake 17bucks build across servers dedicated to leaking mods. However, after realizing that gaining access to these servers would require more effort than expected, they decided instead to create a YouTube channel and a Twitter account to distribute the build themselves.

A few days later, Misael created the Venteru_17 account for this exact purpose, to publicly share the fake 17bucks build that contained the token logger. In a message, Misael shared the Venteru_17 YouTube channel link along with a screenshot proving he was the owner of the account.

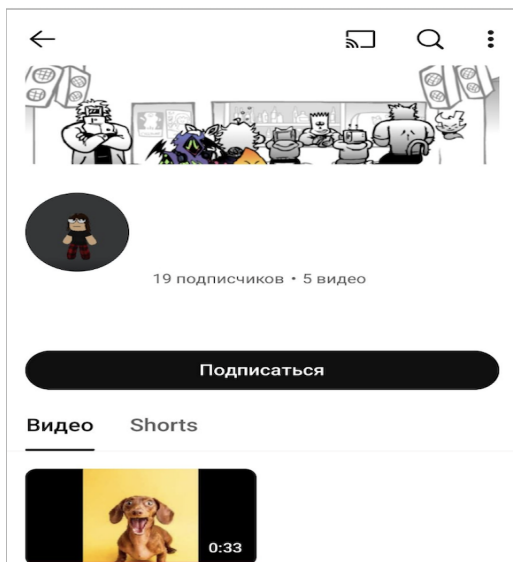

** Misael sends the Venteru_17 YT channel link as well as a screenshot sharing they are the owner of the account*

Translation:

Anonymous User: "Who is that?"

Misael: "It's my new account to spread the 17bucks with token logger"

SIDE NOTE: Another account associated with the Venteru_17 Twitter was found, but its name will not be disclosed since it still has leaked material posted. Based on the evidence, it might belong to a random user who came across the files these individuals had released, although it's also possible that it was another alt account belonging to Fabicholas, Misael, or elfb34. This could not be definitively confirmed.

HOW THE TOKEN LOGGER WORKED:

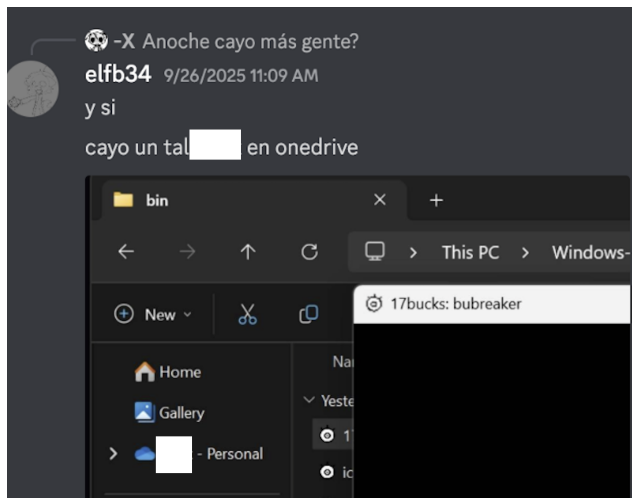

The token showed the following information in this exact format to elfb34 on a secret application he had, being the only one with access to it.

- IP ADDRESS, COUNTRY AND REGION OF THE USER, CITY, INTERNET SERVICE COMPANY, ORGANIZATION, EXACT COORDINATES OF THEIR PC, DISCORD USERNAME & ID, EMAIL, PFP, PHONE NUMBER, "GUILDS", SERVERS WHERE THEY GOT ADMIN PERMITS, IF THE ACCOUNT HAD MFA ENABLED, "FLAGS", LOCALE AND IF THE ACCOUNT WAS VERIFIED.

Geolocation data from		IP2Location	Product:
 IP ADDRESS:	 ISP:		
 COUNTRY: Mexico 	 ORGANIZATION:		
 REGION: Mexico	 LATITUDE:		
 CITY:	 LONGITUDE:		
Incorrect location?	Contact IP2Location	 view map	

New user data:	discord username	pfp
User ID:		
Email:		
Phone Number:		
Guilds:	no idea what this shows but it's a number	
Admin Permissions:	servers name where you are in and have admin	
MFA Enabled:		
Flags:		
Locale:		
Verified:		

This was the way they got access to the official bucks build, as the youtube channel reached to the bucks dev team, 2 of the main devs involved in the making of builds got their accounts grabbed by this token logger, they breached into their PCs, and chaos started there. (Conversations are from the 26th of September:)

Translation:

Misael:

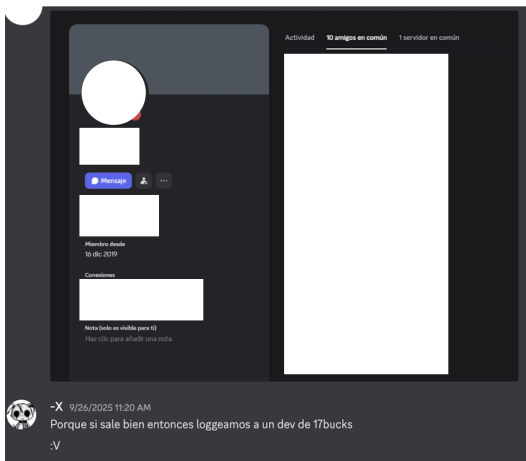

"Did anybody fall for the logger last night?"

elfb34:

"Yeah"

"Apparently someone named [17bucks dev] fell for it in onedrive."

** Then, elfb34 sends a screenshot of him with the application open using the developer account.*

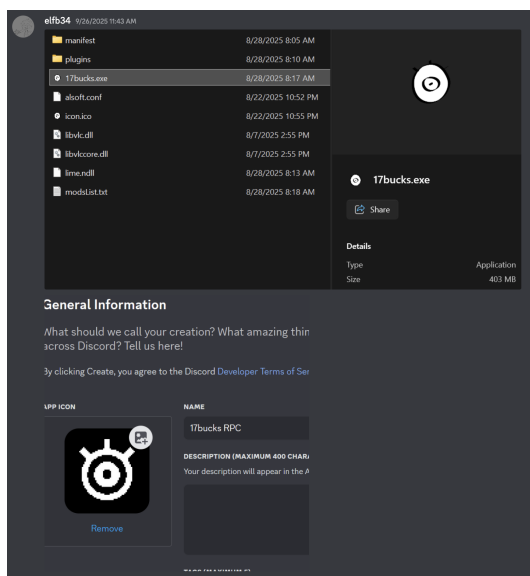

**Anonymous User sends the developers discord account to confirm the identity of the hacked user*

Translation:

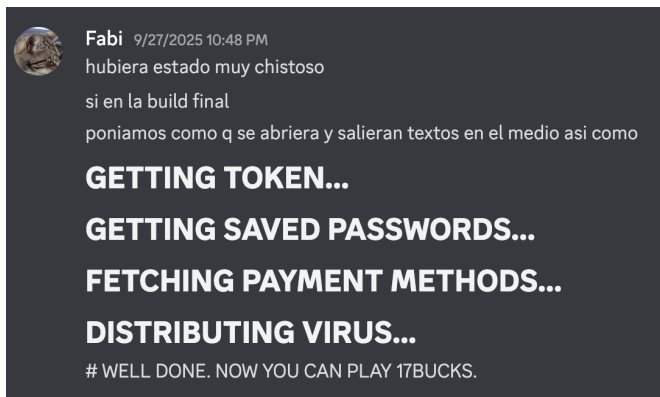

Misael:

"Because if it's what I think it is we just logged one of 17bucks devs"

** Screenshots of elfb34 with access to the files for 17bucks, both available for discord activity and the folder files.*

PROOF OF THEM BEING ALL DOWN FOR THE IDEA:

Translation:

Fabicholas:

"It would've been funny"

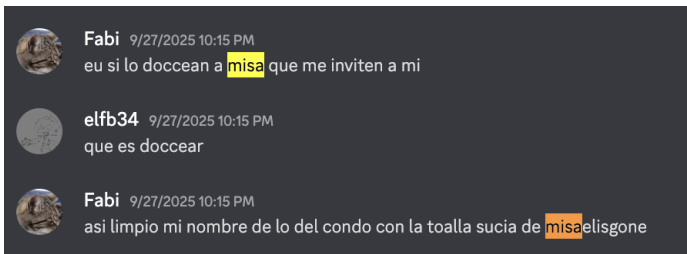

"If on the final build, we placed texts that appeared when you opened the build that said things like

- Getting token...
- Getting Saved Passwords...
- Fetching Payment Methods...
- Distributing Virus...

Well Done! Now you can play 17bucks."

FABICHOLAS & ELFB34 TRIED TO MITIGATE THE ATTENTION ONLY TO MISAEL/BLINDY:

It is also really important to mention that Misael AGREED to take all the blame so Fabi and elfb34 wouldn't end up been too affected, so the times that Misael posted on his and Venteru17 accounts acting crudely and aggressive were just an excuse to divert attention from Fabi and elfb34.

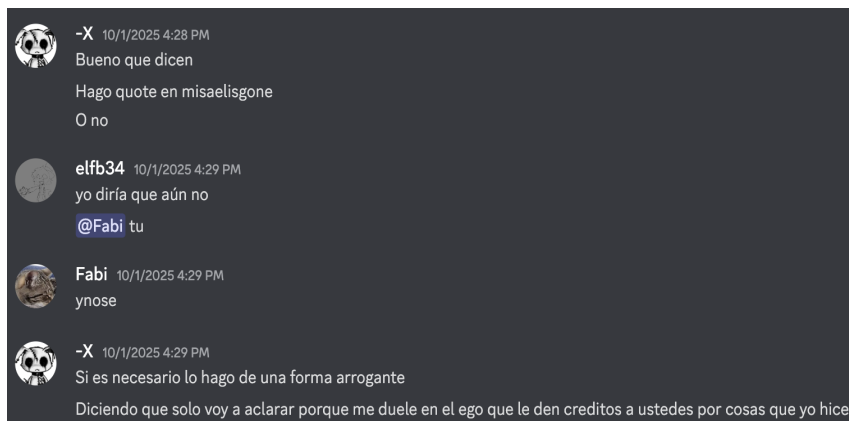

Translation:

Fabicholas:

"Yo if y'all dox misa invite me"

"That way I can clean my name from the condo shit on misaelisgone dirty name"

Misael:

"Well what y'all think, should I quote on misaelisgone account, or nah"

elfb34:

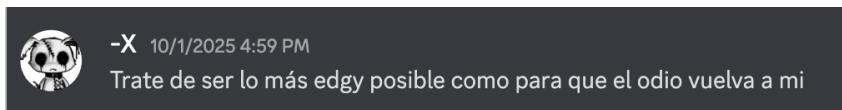

"I would say not yet, @fabu wdyt"

Fabicholas:

"idk"

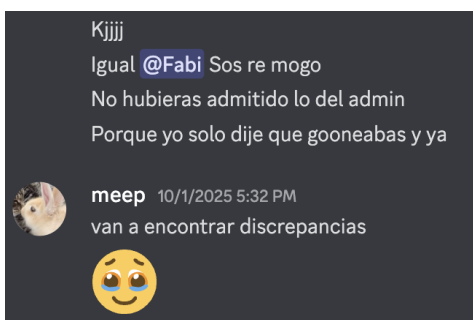

Misael:

"If it's necessary I will do it in an arrogant way, I will clarify it hurted my ego for people crediting y'all when I made everything" (*trying to mitigate attention to Misael instead of the other two*)

Misael:

"I tried to be as edgy as possible to redirect all the hate towards me"

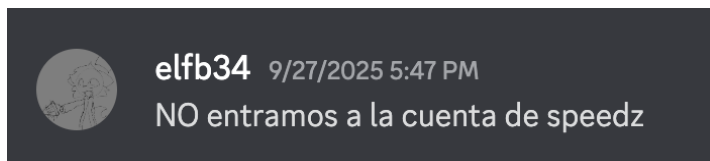

**Later that day*

Misael: "Either way Fabi you are retarded, you shouldn't had admitted about the admin shit, why didn't you said you goon and that's it" (This was a conversation about the next topic will discuss in this doc.)

mrmeep64: "People will find discrepancies"

Misael, Fabicholas, elfb34 & mrmeep64 ALSO managed to hack a couple of accounts as well as tried and targeted other people's accounts. (this conversation was during a vc)

Although getting 2 bucks devs with the hack, they almost got the token for Speedz too, but failed.

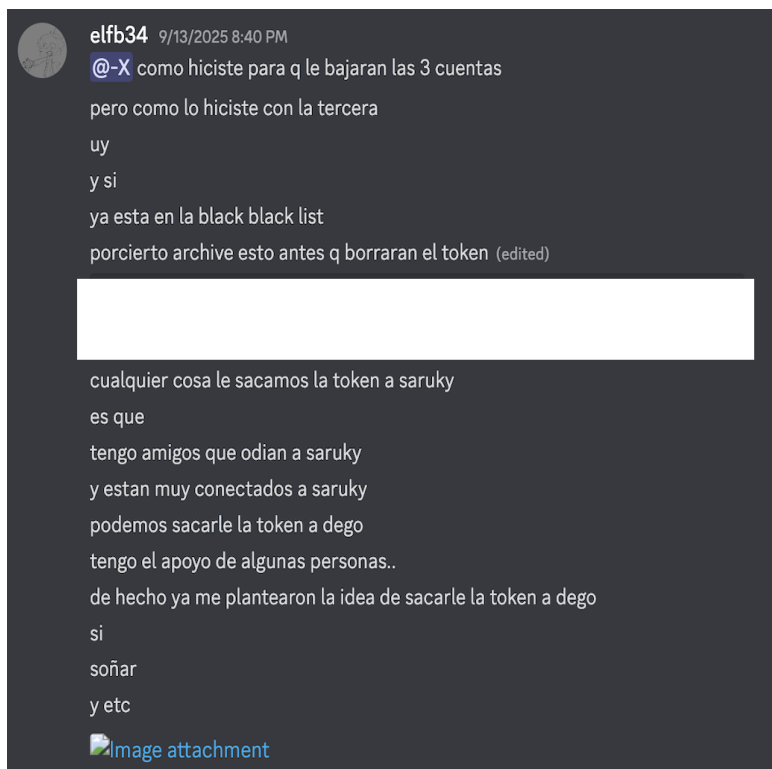

Translation:

elfb34:

"We DIDN'T manage to enter Speedz account"

They also tried to hack into Saruky's and DegoDraws's accounts. (FNF Developers)

Translation:

elfb34:

"@Thiefxenky How did you manage to take down the 3 accounts"

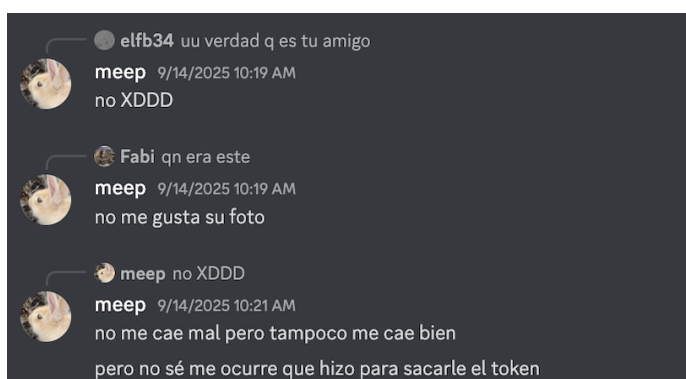

"but how did you do it with the third one"

"oh, yeah, they are in the black black list, I also archived this before they deleted the token"

* elfb34 sends some chat logs from Anonymous User

"In any case We'll try to get Saruky's token, it's because, I have some friends who hate Saruky and have connections with Saruky, We could try to get Dego's token, I have the support of multiple people, which already gave me the idea to get his token, yeah, dreaming, etc."

Finally, mrmeep64 also suggested getting Matriculasos token (an FNF modder.) The reason they wanted their token is because they're part of a Discord group that includes DegoDraws and Saruky, so their plan was to get Saruky's private information through Matriculasos.

Translation:

elfb34:

"ohhh right he is your friend right?"
(Speaking of Matriculasos)

mrmeep64:

"No XDDD"

*Unrelated comment of a pfp

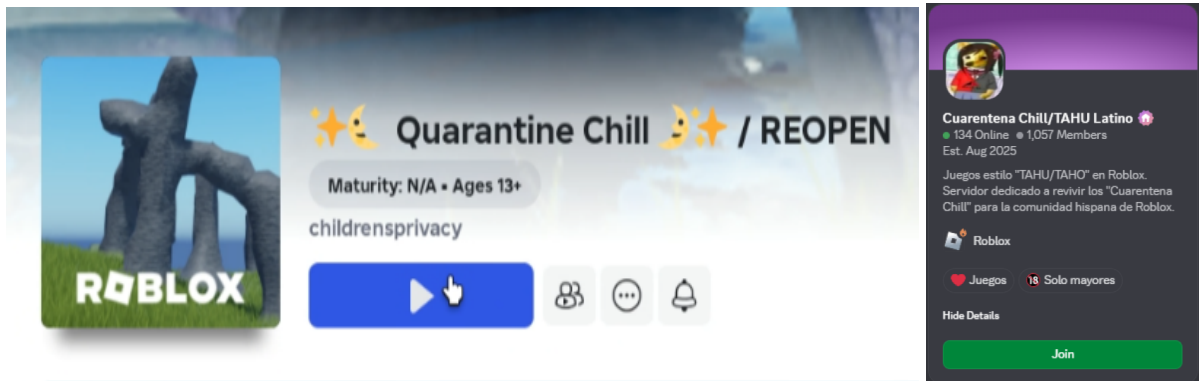

"I don't hate him but I also don't like him, I still can't think of a good reason to get his token"

(Speaking of Matriculasos)

As you can see all these guys were actively involved in the bucks situation, but now, we move onto more serious topics, discretion is advised.

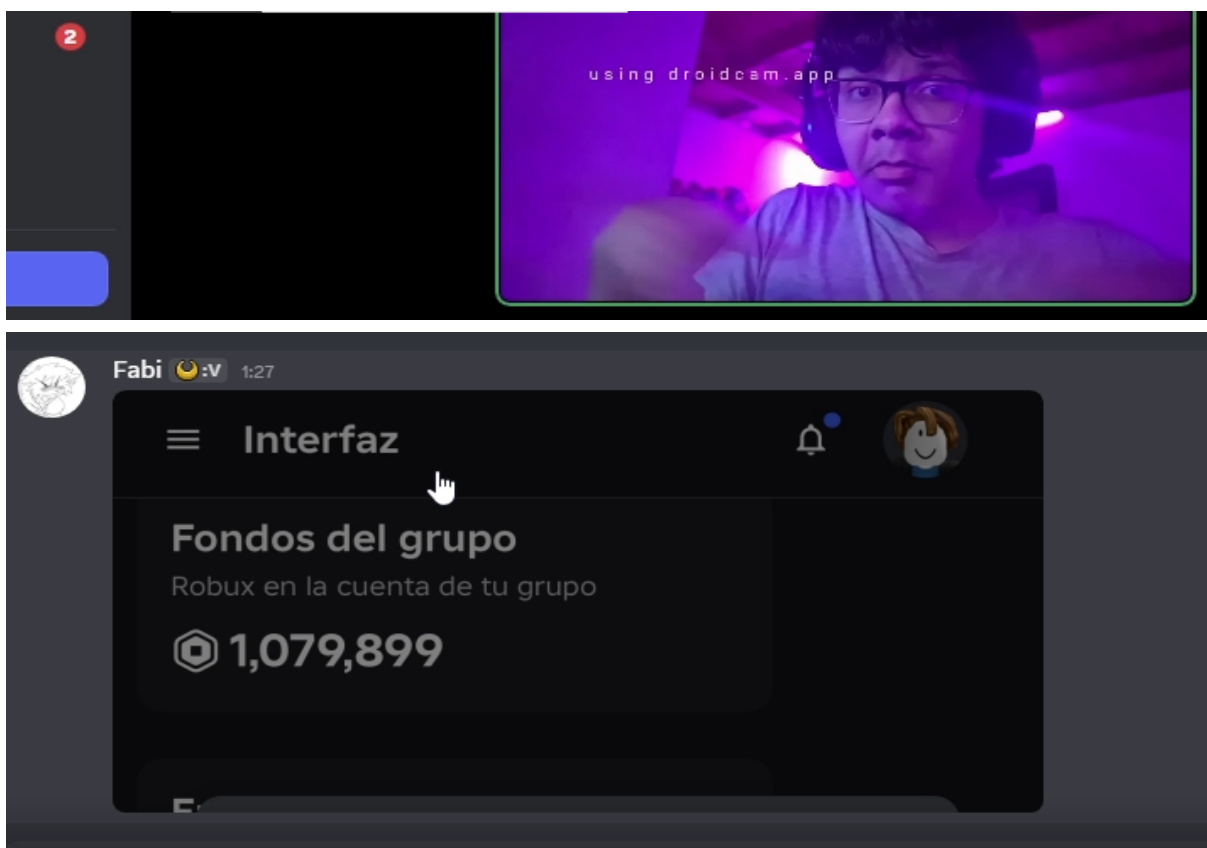

QUARANTINE CHILL CONDO:

A roblox game was placed under the name "Quarantine Chill", which was the name used for both the game and the discord server, sometimes written in Spanish, other times in English.

CREATION OF THE CONDO:

Initially, The story Misael gave to justify himself with people who found about the condo goes like this: The Condo was made as an excuse to generate a big amount of Robux in a short period of time, Misael would make an unlimited waiting line for the people who tried to join which was only skippable when paying a sum of robux (Screenshot proving the amount of Robux earned by the "group" via Fabicholas, as well as him in vc the moment he shared it.)

Being that it was a +18 RP game and seeing the current fire Roblox has been facing this year for their problems involving predatory people (2025), Misael would then ban any person who paid to join the Condo, since there wouldn't be any way to report the game as a scam due to users fully knowing connecting to this type of servers could put their account potentially at risk of ban.

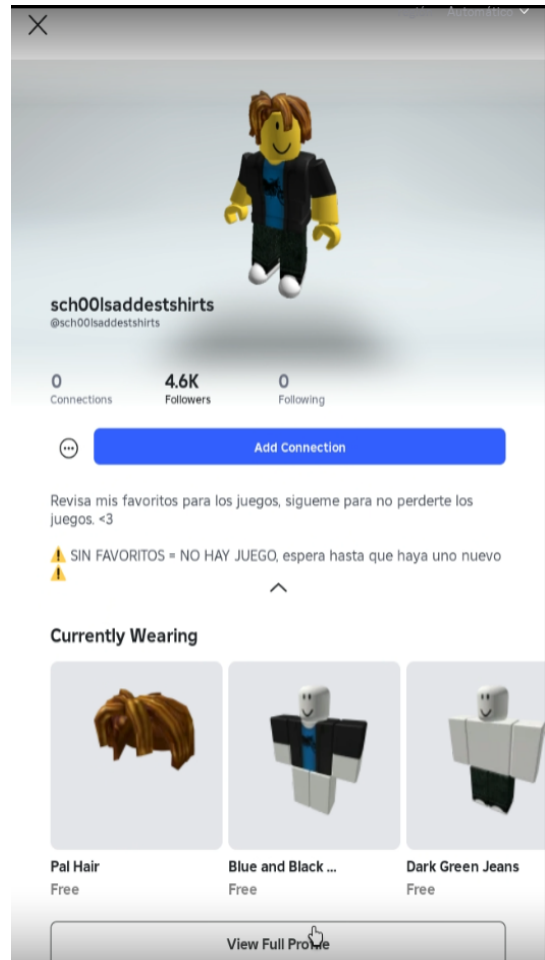

Sch00lsaddestshirts & Bypassing Roblox Security:

As you can see in the last screenshot, the face for the roblox profile responsible of leading the roblox group is a "bacon" character and not Fabicholas or Misael avatars, this was because of Misael's way of avoiding Roblox Security System, which came by using an alt account by the name of "[sch00lsaddestshirts](#)" to reupload the game every time it went down.

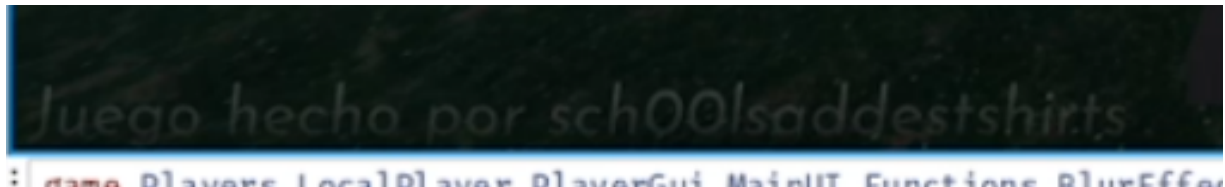

For what people heard of Fabicholas explaining in VC, Misael would create the initial waiting line server in another account named "[misa ALT666](#)", it would then lead you to the real Condo after paying, the game was reupload every time by this "sch00lsaddestshirts" alt account as a private/unlisted game, only being able to join as a teleport from the first waiting line server, that way the Roblox reporting system would take the game down but never permanently ban his accounts.

The biography of the account has the saying "Look on my favorite games and follow me to not miss the games", clearly speaking about the Condo and another way of accessing it once it started to spread around.

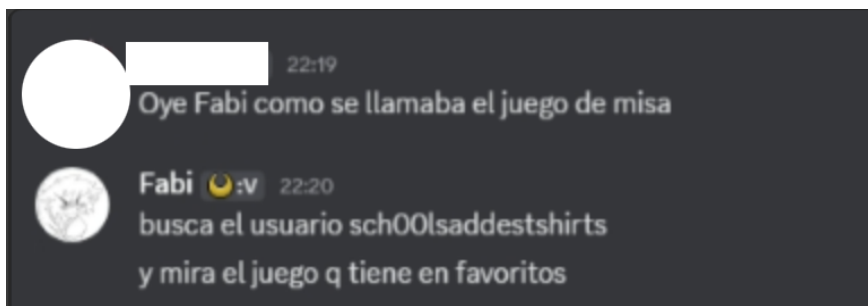

Proof of Sch00lsaddestshirts being credited as the owner of the game or at least involved in it can be seen in all of the screenshots inside the game on the bottom left corner of the screen/window:

"Game made by Sch00lsaddestshirts"

Fabicholas confirming sch00lsaddestshirts is Misael:

Anonymous User:

"Hey Fabi, what's the name of Misa's game?"

Fabicholas: "Search for the user sch00lsaddestshirts, and look at his favorite games "

(matching with the bio of the Roblox Account, Fabicholas also confirms unintentionally that Misael and sch00lsaddestshirts are the same person by replying to the other guy question)
Fabicholas confirming the game is about +18 RP and AGAIN confirming it's Misael's game

Anonymous User:

"What's the game even about?"
"is it like about fucking or something"

Fabicholas:

"Yeah"

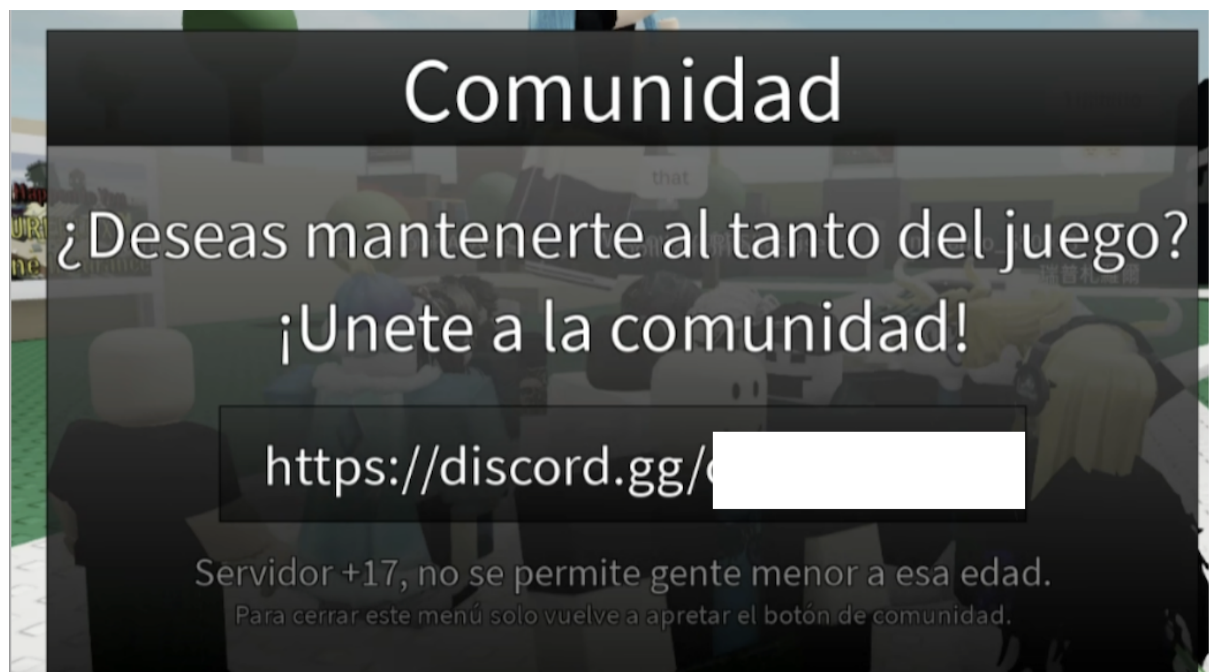

Anonymous User:

"LOL"
"But is it really Misa?"
"fuuuuck"

Fabicholas:

"Yeah"

After Fabicholas confirmed Misael's identity, We decided to look more into detail, an insider found the next announcement stating the discord server you saw at the beginning of this doc section.

MISAEAL STARTS USING THE CONDO AS AN ACTUAL +18 RP SERVER:

For what we managed to see, Misael and Fabicholas decided to keep the Condo open as a community as time went by, suddenly the Condo stopped being a place of trolling and earning robux easily to become a place where They could hang out and actually interact with the people who joined, slowly, both of them stopped trolling and banning people to actually let them Roleplay, this ended up on the creation of this "community" of sorts, where they commonly interacted. This server, much like the Condo game itself, lacks a proper age verification system, leaving minors especially vulnerable to grooming and other predatory behavior.

After this point, the situation keeps getting weirder, and harder to process, as we manage more deep and heavy topics as well as the details not being fully known; discretion is advised.

Fabicholas, seeing the opportunity, started to constantly stay in the Condo, Roleplaying and talking to people on it as a daily routine.

FABICHOLAS WAS AN ACTIVE USER OF THE CONDO:

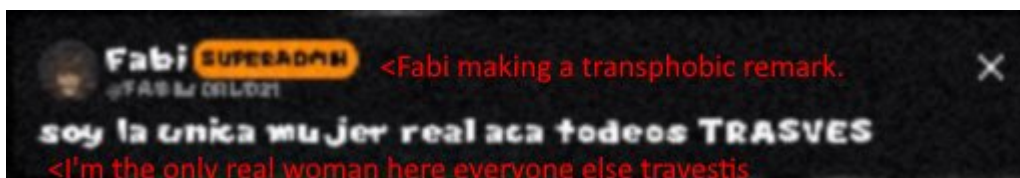

- First screenshot comes from Fabicholas DMs, it's him taking a screenshot roleplaying with a random, while asking to "go harder or smth"

- The second screenshot shows Fabicholas also roleplaying while the guy behind him says "I know Fabicholas, Now I'll make you mine" while the guys looking are saying more sexual stuff. I don't feel like translating, I feel sick seeing this.

Fabicholas had the reputation of being Misael's "partner" in the server because people thought Fabicholas was a woman. This led many people to start doing this type of thing shown in the screenshots to feel "important" in the condo. On one of these occasions, Fabicholas was offered Robux to roleplay with someone. This practice occurred a couple of times, until Fabicholas found an "anonymous" partner from the condo who thought he was a woman. (it's the girl you see dressed as a bee on all of this interactions)

Fabicholas continued talking to her until Misael stopped him and decided to tell this girl not to be with Fabicholas anymore and to be with him. This all ended up with Fabicholas getting back together with this girl while he was still pretending to be a woman. After a while, they broke up because she was actually catfishing Fabicholas just like he was, and it all ended up being kind of weird. (screenshot taken from @MrSteelBurner on twitter)

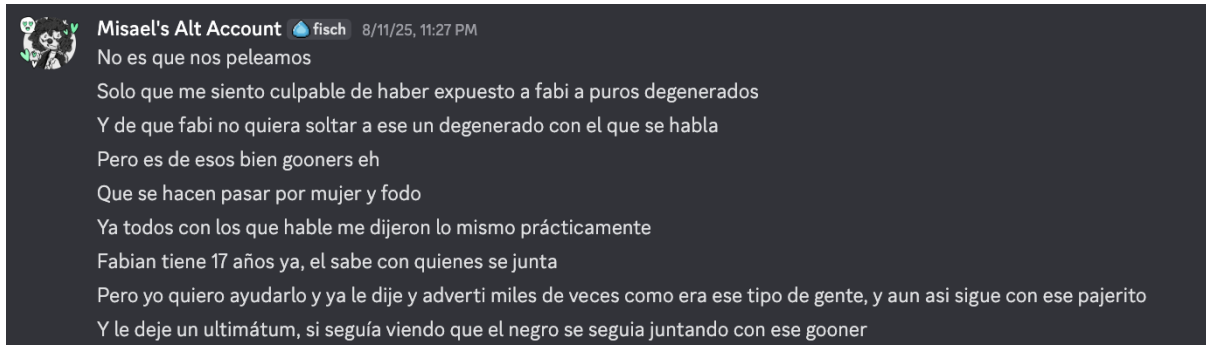

<I'm the only real woman here everyone else is "Trasvestis" (Trans)

FABICHOLAS BAN:

Misael banned Fabicholas from the condo at one point in July because he was spending A LOT OF TIME THERE. Plus, the "supposed partner" thing had happened in the condo, Misael found this weird and temporarily banned him.

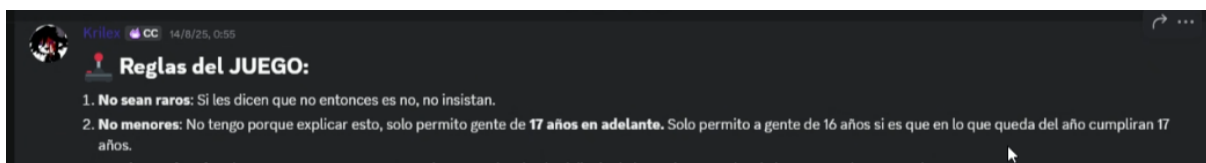

MISAEEL FEELING GUILT FOR EXPOSING FABI TO PEOPLE THAT WERE GROOMING HIM:

"We didn't really fight (speaking of Fabicholas and him), I just feel guilty for exposing Fabicholas to these degenerates, and that Fabicholas doesn't wanna stop talking to one of those degenerates, He's one of those big gooners y'know, those who try to pass as a woman and all of that; Either way everyone told me that, Fabicholas is 17 y/o, he knows the people he's surrounding himself with, but I want to help him and I already warned him a thousand times how's this type of people, but he still wants to be a gooner, so I gave him an ultimatum, if he kept talking to that gooner guy..."

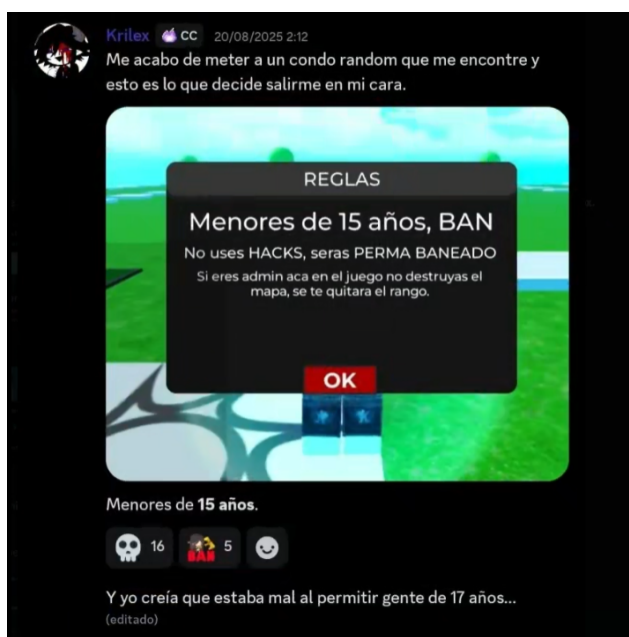

Misael set the discord server under the name of "Krilex", one of the most shocking things we found was that for a certain period of time, on the rules section, for the "game rules" the second rule was "no minors", but the rule reads the following:

Misael: "2. No minors: No need to explain this, I will only allow people that have +17, I will only allow people in the range of 16 if they are having their 17 birthday this year"

Not only does this seem like predatory behaviour, but it's also hilarious when you realize that the discord server didn't have any age verification, as well as Misael starting to visit other Condos, starting to criticize these other servers where they allowed +15 year olds.

Krilex: "I just joined a random condo I accidentally found and this is what appeared on my face."

*Rules: People below the age of 15, BAN, Don't use HACKS, you'll be PERMA BANNED, If you are admin of the game do not destroy the map, We'll remove your role *

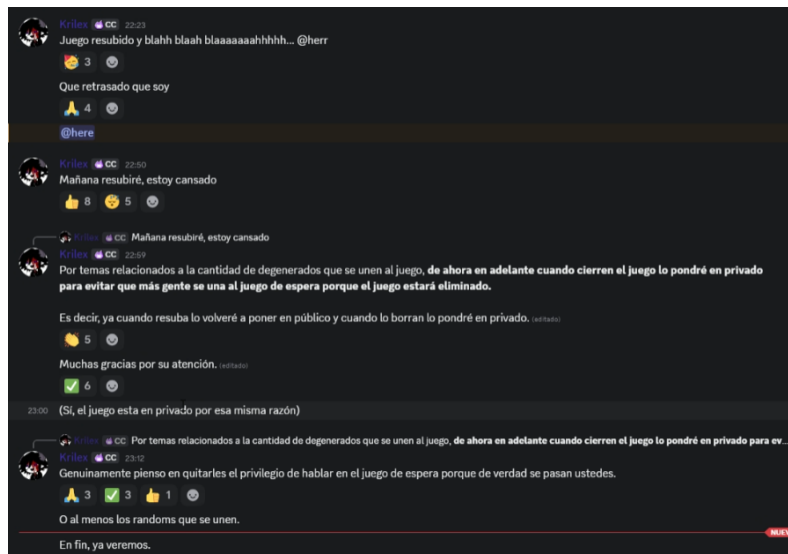

Krilex: "People below the age of 15."

Krilex: "and I thought I was doing wrong for letting 17y/o join mine"

(This last comment blows my mind, how are you gonna be THIS disconnected from your own actions.)

Finally, the Condo still operates till this day, it's important to mention there are more details that we did not mention as we didn't thought were really that necessary, but here are some more screenshots we couldn't fit in the line of the doc:

Misael announcements on the server:

Misael's most recent account "-X // Thiefxenky", confirming he was also Krilex

Anonymous User:

"ah"
"but who tf"
"is Krilex"

idk why messages seem to be splitted)

Misael:

"It's me"
"dummy"

IMPORTANT NOTE: MISINFORMATION ON THE TWITTER THREADS:

We would like to clarify that, in the past few days, several individuals from specific servers have been dragged into this situation regarding the Roblox Condo, simply because they appeared to have joined it at least once. However, there is a significant lack of evidence proving that they were either active participants in the Condo or that they joined with the intention of roleplaying.

Based on multiple testimonies, it is now known that Fabicholas actively invited random people from various servers to join him in the Condo without initially explaining what it was.

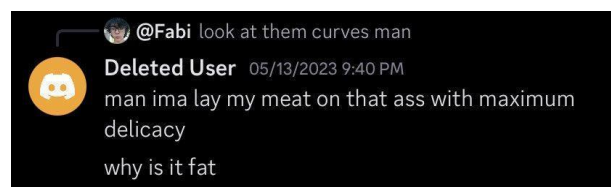

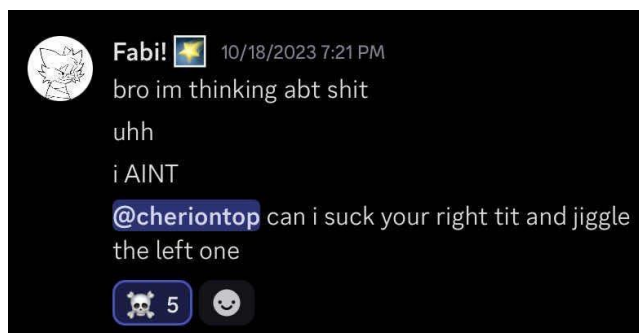

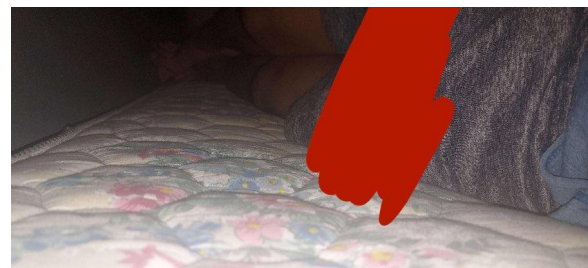

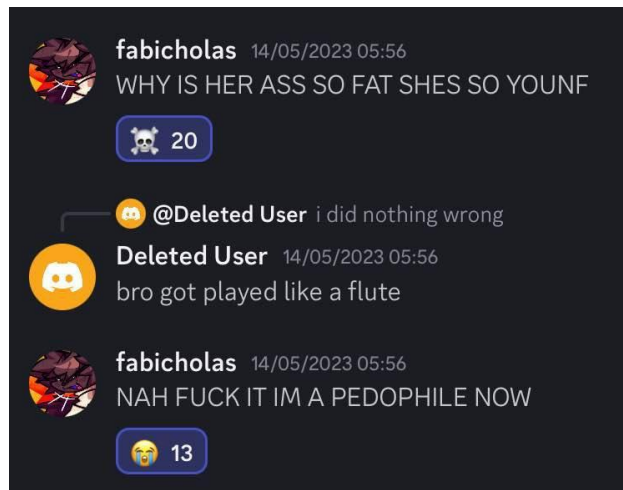

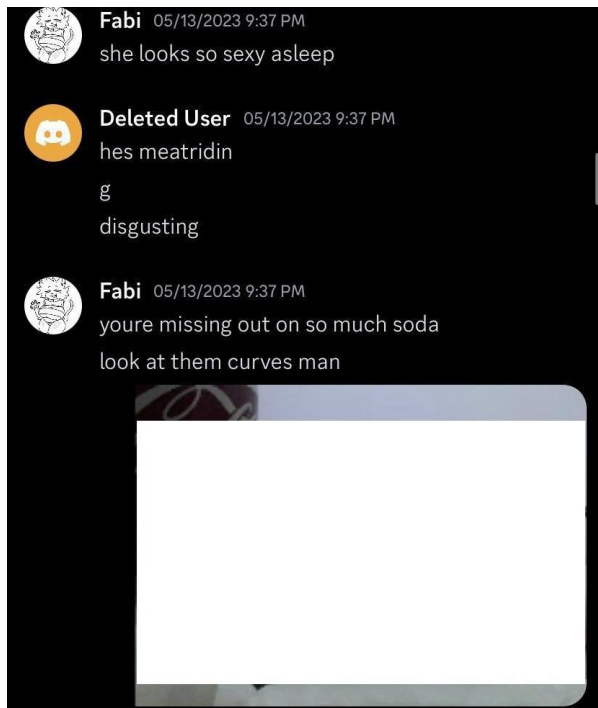

We have also spoken with several of the individuals mentioned in the threads, and the majority were banned from the Condo by Misael, mainly because they were trolling or disrupting the experience for both Misael and Fabicholas. In fact, many of those invited made fun of them for acting strangely or decided to troll other users instead.

Therefore, we strongly doubt that these individuals were actively involved with the Condo, its creation, or any related matters.

FABICHOLAS AND HIS CREEPY BEHAVIOUR TOWARD A 12-YEAR OLD:

Recently someone under the name of "cheri" has come forward accusing Fabicholas of harassing her in a sexual manner when she was 12 years old, while Fabicholas was 15.

According to the evidence presented, Fabicholas can be seen in what appears to be a Discord server (as suggested by the reactions) making inappropriate remarks about her appearance and displaying disturbing behavior toward her.

In case you want to see more information about this, please go to [cheri's twitter account](#).

As you can see, this situation just keeps getting worse and worse, but it's time to talk about the worst part, so I would like to mention to beware for what's coming next.

The following testimony comes from a person who had the unfortunate to interact with Misael's close friend group, which are not involved in any way to the Friday Night Funkin' Community, this group is known for doxxing, extorting and even stalking and harassing the people they don't like, so we would like to maintain anonymous our witness.

DISTRIBUTION OF CP - TESTIMONY:

Everything began after a big discussion between me and the second co-owner of Mexifloor in one of our private servers. Due to his constant dramas and fights with others, we decided to remove him from the team and the project entirely.

Following this, both he and I agreed to take a break from the internet. (I should note that this person threatened me to take his own life after being removed from the project, which left me emotionally vulnerable. During this period, I started to vent around the people that took the role of directors on the mod at the moment, which were both Fabicholas and Misael.) What follows is entirely accurate and not open to interpretation. This incident involved only me and Misael, and as traumatic as it was, I remember every detail clearly.

While taking my break, I was suddenly added to an unfamiliar group chat and immediately called. I noticed Misael was the one who added me, so I joined, thinking it might be important. The moment I entered, I was met with laughter and chaos. The people there tried to make small talk while Misael repeatedly begged me to leave and ignore them. Confused, I scrolled through the chat to understand what was happening, until I came across a GIF showing fragments of what I can only describe as a pornographic video involving a baby. I froze in shock and immediately left the call, terrified. When I confronted Misael, he admitted the GIF contained parts of the infamous "Daisy's Destruction" video. Horrified, I demanded an explanation. He claimed it wasn't him who sent it, that he had been doing "dares" with others in the call, and after losing a bet, he gave them remote access to his PC through Parsec. One of them allegedly used his account to send the GIF and add me to the chat. Still, Misael had allowed them access, enabling the entire situation.

He begged me to forgive him, saying I had been "in the wrong place at the wrong time." He warned me that the group was involved in raiding, doxxing, and other harmful activities, and that I should stay out of it for my own safety. Despite his excuses, I immediately informed the Mexifloor team. We collectively decided to cut all ties with Misael and remove him from the project.

However, Fabicholas chose to continue speaking with Misael privately, claiming he was "not as bad" as the person we had previously removed. This was the final straw for me, I decided to leave the group and officially cancel Mexifloor. To clarify, most members of the Mexifloor team had nothing to do with these events. These incidents occurred in private spaces unknown to them.

I sincerely apologize for not bringing this to light sooner. At the time, I feared for my safety, as this group had access to my personal information, including my location, phone number, and real name, details that I know Misael has. I hope this statement clarifies everything, and I ask for understanding given the risks I faced in speaking out. Thank you.

CONCLUSIONS:

As you can see, all of this is a MASSIVE problem that goes BEYOND the Friday Night Funkin' Community, and we feel sorry all of this people have been associated with the fandom, specially since modders were almost all the victims of this situations, We wish all of you who got affected by the actions of this people nothing but the best for here on forward.

Both Misael and Fabicholas have admitted privately to be planning to come back with other accounts, or after some time, but the ones doing this document think it's important to bring all of this so people KNOW about what they did, and why they shouldn't be welcomed anymore, any time soon, or later. As to the rest of the people involved in this, we would recommend taking a big break from the internet to work on yourselves, as we don't think you guys see the real danger in everything you guys did.

To the people roped into this that didn't had to do anything with any of these subjects, or those who even helped us get proof for this document and were caught on the threads of the twitter accounts, We feel sorry for you and We would like to tell the people who took others for the same blame as Misael, Fabicholas, elfb34 or mrmeep64 had on this subjects, to reconsider after reading all of this information, as besides who we mentioned here, there's no solid proof of them actually either helping with the bucks leaks, or the Condo.

Thank you all for reading, and once again, we hope everyone affected can find themselves in a better state soon, we send the best wishes to everyone.
