Match up

Below you will find a series of terms and a series of definitions from Lessons 1 and 2. They are not matched up. Draw lines to match the term to the correct definition.

Term	Definition
Path	An operation used to create a single path from the overlapping portion of two paths.
Z-order	An operation used to combine two or more paths to create a single path.
Union	The border of a shape.
Stroke	A line or a shape used to create vector graphics.
Intersection	Being the same distance away as another.
Equidistant	The sequence of overlapping objects used to create a vector graphic.
