DAY 1

AM: BALTRA AIRPORT

Welcome to Galapagos! Upon arrival at Baltra Airport, your naturalist guide will greet you and assist with the transfer to Itabaca Channel. This initial journey offers your first connection with the archipelago as you take a short ferry ride to Santa Cruz Island. Along the way, observe Baltra's arid landscape and learn about its history as a former U.S. WWII airbase. This is just the beginning of the many fascinating stories awaiting you on your adventure.

PM: PLAZAS

Of the two twin islands, only South Plazas is open to visitors, while North Plazas remains a scientific research site. Despite its small size, South Plazas is teeming with wildlife. Upon landing, ll find land iguanas lounging beneath Opuntia cacti, waiting for fallen fruit. A large sea lion colony dominates the shore, where playful pups explore tide pools while massive bulls defend their territory. The trail leads to a dramatic cliffside, offering breathtaking ocean views where frigatebirds, blue-footed boobies, red-billed tropicbirds, and swallow-tailed gulls soar. A blanket of reddish succulents covering the island adds to its striking beauty.

There is no landing here so you will be doing a boat tour on the dinghies, exploring shallow channels and small coves surrounded by beautiful mangrove forests. Reef sharks, sea turtles and several species of rays inhabit this beautiful area which is considered an important mating area for turtles and a nursery for several species of sharks. Herons, pelicans and boobies are also common here as they pray in schools of anchovies.

PM: HIGHLANDS

Either if you do this visit starting from Baltra or from Puerto Ayora, a bus will take you to the highlands stopping along the way at one of the reserves to visit the lush highland forests where you will look for Galapagos Giant tortoises in their natural environment. This is the best place in the Galapagos to see these gentle giants (reaching over 300 kg / 600 pounds!) casually grazing and resting in freshwater ponds. This is also home for a great diversity of birds rarely found at the lowlands, including finches (tree, woodpecker and vegetarian finches), flycatchers and several species of water birds. You will visit a lava tunnel (depending on the itinerary) and learn how these extraordinary formations were created by ancient volcanic eruptions.

Red footed and Nazca boobies are abundant along the trail. At the base of the cliffs you can see Galapagos fur seals resting in shaded areas, as well as several species of seabirds.

You will walk in a very well preserved flow of Pahoehoe lava, which will give you endless opportunities to see the delicate textures of these types of lavas which only appear in a few places throughout the world. At first sight the barren landscape looks completely deprived of life, but look carefully for pioneer plants, lava lizards and small birds.
