

## DEFINITION

The value at the centre of a numerically ordered list of values.

## CHARACTERISTICS

- May be one of the values, or halfway between two values.
- Position of the median found by  $\frac{n+1}{2}$  where  $n$  is the number of values, for a small list.
  - If median is between two values, add the values and divide by 2 to find it.
- Unaffected by outliers.
