

Young Sparks

Design thinking workshop for kids

Overview

This fast-paced workshop introduces kids to design thinking methodology through fun and interactive activities. Kids are encouraged to express their creativity and critical thinking while unpacking real world problems. Using a real world issue as a catalyst, participants create their own solution to a problem using loose parts.

Format

3-hour workshop, delivered in person. Between 5-20 participants. Appropriate and adaptable for ages 8-18.

Outcomes

- Science enquiry
- Working as a team
- Design thinking skills (empathy, ideation, prototyping)
- Verbal presentation skills

Workshops can be altered to suit specific outcomes or to focus on particular themes.

Marketing

Marketing copy and imagery supplied if required.

Requirements

Classroom, conference room, or community hall. Our workshops utilise plenty of loose parts for kids to explore their ideas and create with, so we require enough space to get messy.

Pricing

\$500.00 plus travel costs.

Ex GST. In-person delivery.
