

PSA: As of Patch 8.5, I believe Riot has removed the ability to add custom Announcer Packs. According to their audio team, they are upgrading their audio system in game. So either later down the road they'll re-add the original files or this is the end. Will keep you posted.

9 months ago, I made the first Sneaky and Meteos Announcer Pack and I never expected for it to receive so many positive responses and having it seen by Sneaky and Meteos themselves. Needless to say, it blew up, it blew up fast. So what has changed since the first one? The answer? Everything. Everything in this pack is all new lines from the meme brothers, ready for you to listen to and enjoy packed with more madness then before!

****Instructions**:**

1. Download the pack (This time around I've included a link to dropbox along with Mediafire in case people have problems with Mediafire.

Mediafire link:

http://www.mediafire.com/download/wwinvjh1d86au80/Sneaky_and_Meteos_Announcer_Pack_2016_VERSION.7z

Dropbox Link here!

<http://www.dropbox.com/s/bfbfqkc2rsc5voy/Sneaky%20and%20Meteos%20Announcer%20Pack%202016%20VERSION.7z?dl=0>

2. Extract it using a program like WinRAR or 7-Zip. If you're on Mac, find the equivalent if possible.

3. Go into the folder and you will see a .wpk file like this. <http://i.imgur.com/WqhON4n.png>

4. Make sure League of Legends is closed. Then proceed to the next step.

5. (UPDATED FOR 7.23) For ****NA**** go to - C:(or wherever else you have it saved)\Riot Games\League of Legends\RADS\projects\lol_game_client_en_us\managedfiles\0.0.1.125\DATA\Sounds\Wwise\VO\en_US\Shared

(UPDATED FOR 6.15) For ****EUW and EUNE**** go to - C:(or wherever else you have it saved)\Riot Games\League of Legends\RADS\projects\lol_game_client_en_gb\managedfiles\0.0.1.40\DATA\Sounds\Wwise\VO\en_US\Shared

For ****OCE**** go to - C:(or wherever else you have it saved)\Riot Games\League of Legends\RADS\projects\lol_game_client_en_gb\managedfiles\0.0.0.124\DATA\Sounds\Wwise\VO\en_US\Shared OR C:\Riot Games\League of Legends\RADS\projects\lol_game_client_en_au\managedfiles\0.0.0.127\DATA\Sounds\Wwise\VO\en_US\Shared

(UPDATED FOR PATCH 6.15) For ****Mac**** go to - C:(or wherever else you have it saved)\Riot Games\League of Legends\RADS\projects\lol_game_client_en_us\managedfiles\0.0.0.217\DATA\Sounds\Wwise\VO\en_US\Shared

Also for Mac, right click League of Legends.app -> Show Package Contents. Rename "Announcer_Global_Female1_VO_audio.wpk" to "Announcer_Global_Female1_VO_audio.wpk.old" And see if that fixes some issues.

For ****Garena**** go to - C:\Program Files (x86)\GarenaLoL\GameData\Apps\LoL\Game\DATA\Sounds\Wwise\VO\en_US\Shared

For ****LAN**** go to - C:(or wherever else you have it saved)\Riot Games\League of Legends\RADS\projects\lol_game_client_es_mx\managedfiles\0.0.0.134\DATA\Sounds\Wwise\VO\es_MX\Shared OR C:(or wherever else you have it saved)\Riot Games\League of Legends\RADS\projects\lol_game_client_en_us\managedfiles\0.0.1.20\DATA\Sounds\Wwise\VO\en_US\Shared)

For ****BR**** go to - C:(or wherever else you have it saved)\Riot Games\League of Legends\RADS\projects\lol_game_client_pt_br\managedfiles\0.0.0.182\DATA\Sounds\Wwise\VO\pt_BR\Shared

(UPDATED FOR PATCH 6.15) For ****KR**** go to - C:(or wherever else you have it saved)\Riot Games\League of Legends\RADS\projects\lol_game_client_en_us (if you changed the language from Korean to English; otherwise it is ko_kr)\managedfiles\0.0.0.251\DATA\Sounds\Wwise\VO\en_US\Shared

For ****PBE**** go to - C:(or wherever else you have it saved)\Games\LOLPBE\RADS\projects\lol_game_client_en_us\managedfiles\0.0.3.87\DATA\Sounds\Wwise\VO\en_US\Shared

The ****Mac PBE**** is 0.0.2.145.

****NOTE**** If the above paths for your region are incorrect, please find the correct path for your region and either comment on the post or PM me so I can update it ASAP. The ones updated for the current patch (Currently Patch 6.15) never changed the paths so they should work. If not, please tell me.

I also need the paths for the following Regions: TR, RU, LAS, EUNE and JP. Please post what the path is and I will add them to this post!

Step 6. Change the CURRENT .WPK file in your designated file path to .OLD. Afterwards, Drag the NEW .WPK you just downloaded into the folder [Should look like this.](<http://i.imgur.com/ZzMMImN.png>) And you're done!

If all else fails, Go to the "Riot Games" folder and at the top right, it should say "Search Riot Games". Paste "Announcer_Global_Female1_VO_audio.wpk" (without the quotations) and it should direct you to the files you need to edit.

After that, you're good to go!

Here's a VirusTotal link

<https://www.virustotal.com/en/file/9b436efa725cb6107a7923c4eb73e92dffaa606a5ba78c386d5580b28d5210fb/analysis/1470432935/> to show that there's nothing malicious within the contents of the folder.

Hope you all enjoy and if there's any questions, feel free to ask!

****F.A.Q**:**

****I can't get the Announcer Pack to work, what do I do**?** If you've done everything above and it doesn't work, repair your client. This fixes this 99% of the time. Also, try changing the language in your client to English (Depending on what region you play on). Seems to help most users. If it still doesn't work, uninstall league, delete any contents relating to league, and do a complete reinstall.

****How did you get these voice clips**?** I have a bunch of VODs downloaded and I have to listen to them all the way through and cut out which line I want to be in the pack.

****Will this work with Wooxy**?** I have no idea. I've never used Wooxy so I can't really help you out there.

****The link is broken, When I extract it nothing comes up or When I extract it it says it's "Corrupted and can't be opened". What do I do**** Redownload it from the other link or the same link, choose a different browser to download the pack and make sure nothing is blocking your download such as your Anti-Virus.
