Data Loggers I: Plan and Place

Data Loggers Plan & Place Handout	
What type of logger, date(s), time length, and room did you place the data loggers? Why did you choose those factors?	
Example: *HOBO occupancy/light 5-meter (5m) logger #1*	*Example:* *10/12/22 - 10/14/22 in 15 minute increments in the Teacher's Lounge. This is a high traffic room and we are curious how long the lights stay on when unoccupied. It is a small room so 5 meters is the distance.*
HOBO motor on/off logger	
HOBO occupancy/light 5-meter (5m) logger #1	
HOBO occupancy/light 5-meter (5m) logger #2	
HOBO occupancy/light 12-meter (12m) logger #1	
HOBO occupancy/light 12-meter (12m) logger #2	
HOBO temperature/relative humidity (RH) logger	
Did anything happen that was unusual on those days? Examples: Movie day, 2 hour late start, snow day, field trip day, etc.
