

PRIVACY POLICY – TO BUY LIST

Last Updated: September 22, 2026

Developer and Application Information

Developer: Appxel

Application Name: To Buy List

Android Package Name: com.appxel.tobuy

Privacy Contact: appxel.tech@gmail.com

This Privacy Policy explains how Appxel handles information in connection with the To Buy List Android application.

Information We Collect

To Buy List is designed primarily to help users create and manage personal shopping and buying lists. We aim to collect only the information needed to provide and maintain the application's functionality.

Information you enter into the application: If you create shopping lists, item names, quantities, notes, or other content within To Buy List, that information may be stored locally on your device so that the app can provide its list-management features.

Device and technical information: The application may process limited technical information that is automatically available to Android applications, such as device type, operating system/version, application version, and technical or diagnostic information, when necessary to operate, secure, troubleshoot, or improve the application.

Advertising or device identifiers: If advertising or analytics functionality is enabled in a version of the application, relevant identifiers or technical information may be processed by the applicable third-party service. Any such processing is subject to the applicable service provider's privacy practices and the disclosures made in Google Play's Data safety section.

Location Information

To Buy List does not require your precise location to provide its core list-management functionality. If a future feature requires approximate or precise location, the application will request the applicable Android permission where required and this policy will be updated to describe the specific use.

How We Use Information

Information handled by To Buy List may be used to:

- provide and maintain the application's features;
- save and display your shopping/buying lists and related content;
- diagnose crashes, errors, or technical problems;
- maintain application security and prevent misuse; and
- improve application performance and functionality.

Data Storage

Shopping-list information created in To Buy List is intended to be stored locally on your device unless a specific feature or service is introduced that requires transmission or cloud storage. We do not operate a user account system for the core list-management functionality described by this policy.

Sharing of Information

Appxel does not sell your personal information. We do not intentionally share the shopping-list content you create in the app with third parties for their independent marketing purposes.

If third-party services are integrated into a particular version of To Buy List for advertising, analytics, crash reporting, hosting, or other technical functionality, those providers may process information necessary to provide their services. Such processing will be limited to the relevant service and disclosed as applicable.

Third-Party Services

The application may use third-party Android or Google services when required for specific functionality. Third-party services operate under their own privacy policies and terms. Users should review the applicable third-party policies when those services are used.

Data Security

Appxel takes reasonable measures to protect information handled by To Buy List. However, no electronic storage or transmission method can be guaranteed to be completely secure.

Data Retention and Deletion

For information stored locally by To Buy List, users can generally delete their shopping lists and other app-created content through the application's available controls or by uninstalling the application, subject to Android's handling of application data.

Because the core application does not require a user account, Appxel does not maintain a separate account database containing user profile information for the core list-management functionality.

Where third-party services process technical information, retention is governed by the applicable provider's retention and deletion practices.

Children's Privacy

To Buy List is not specifically directed to children. We do not knowingly collect personal information from children for purposes that require parental consent. If you believe that a child has provided personal information to us, please contact us so that we can review the situation.

Permissions

The application may request Android permissions when a particular feature requires them. Permissions are used only for their stated functionality. The permissions and actual data practices of the current released version should also be reflected accurately in Google Play Console's Data safety section.

Links to Other Services

To Buy List may contain links or integrations to services operated by third parties. Appxel is not responsible for the privacy practices of external services. We encourage users to review the privacy policies of those services.

Changes to This Privacy Policy

Appxel may update this Privacy Policy when the application, its data practices, or applicable requirements change. The updated policy will be published at the privacy-policy URL used for To Buy List, and the 'Last Updated' date will be revised accordingly.

Contact Us

Important Compliance Note

This Privacy Policy applies specifically to the Android application named To Buy List, developed by Appxel, package name com.appxel.tobuy. The policy should be kept consistent with the application's actual code, integrated SDKs, Android permissions, and the Google Play Console Data safety declaration.
