

Think Like a Futurist

Watch the video:

 How Does a Futurist See the Future: 4 Questions You Need to K...

Part A

In the 'Think Like a Futurist' video, the speaker shared the following four ways to think like a futurist:

1. Why might something happen?
2. What else might happen?
3. What are some of the factors that will influence why something will or will not happen?
4. What do you want to actually happen?

Using the questions above, make a prediction about the Future of Work.

"By 2040, I believe that _____ will happen, affecting how we work."

For example: "By 2040, I believe that drones will deliver all our food, so there will no longer be any drive thru windows in fast food restaurants."

My prediction:

Answer the questions below about your prediction:

Why might _____ happen?

What else might happen?

What are some of the factors that will influence why something will or will not happen?
What do you want to actually happen?

Share your prediction with a partner, listen to their prediction in return.

Part B - Reflecting on Our Prediction

(Return to this after you have reviewed the 'Five (5) Trends in the Automotive Industry' with your teacher.)

Now that you have learned more about the 5 Trends affecting the automotive and mobility sector, you may want to change the prediction you made above.

Did your prediction above take into consideration technological advancements, shifting social and economic factors, and changing consumer preferences in our current society? **YES/NO**

My updated prediction:
