app.get('/', (req,res) => {
res.send(`<h1>Welcome to Express <h1> <p>Please click on the following <a
href="/homepage">Link</a></p>`);
});
app.get('/homepage', (req,res) => {
res.send(`<p>Artificial intelligence (AI) is the capability of machines to perform tasks that
typically require human intelligence, such as learning, reasoning, problem-solving, and
decision-making. It achieves this by using algorithms and training on vast amounts of data to
recognize patterns, understand language, and make predictions or decisions. Key components
of AI include machine learning and natural language processing, enabling applications like
self-driving cars, language translation, and complex data analysis across various
industries.</p><br>
To know more about AI in LBRCE <a href="https://lbrce.ac.in/ai">Click Here</a>`);
});
app.listen(PORT ,()=> {
  console.log(`server is listining at https://localhost:${PORT}`);
