Hey there, Becca here from inside the square and this tiny tutorial, I'll teach you how to restore a deleted page in Squarespace. Now, keep in mind, this is not guaranteed. It won't work for every situation. And there's also a 30 day limit. If you've deleted this page more than 30 days ago, it will automatically be removed. But if it's been within 30 days, I'll show you how to restore it, navigate to your pages, menu, and scroll all the way down to the bottom. Until you see this little trash can that says deleted pages, click on that trash can, and you should see any page that you've deleted, select restore when you hover over it. And it will make sure that's what you want to do. Select restore one last time. And it will place that page in the not linked section of your website. I'll show you that one more time. If you've deleted a page and then changed your mind, navigate to deleted pages, hover over the page that you accidentally deleted and select restore, confirm. That's what you want to do. And Squarespace will put that page back into the not link section of your website. Now, remember this is not guaranteed, and if it's been over 30 days, that page can not be restored.
