

TEACHER SPOTLIGHT: MRS. SEEL

By: Morgan Hadley

Mrs. Seel is a phenomenal person, and has been teaching for 24 years. 21 of those years were at East. She has coached many individuals during her years at east and helped them prepare for their futures. She currently teaches biology, forensic science, and AVID. Out of all those courses she teaches, Mrs. Seel enjoys teaching forensic science the most.

She states that “it is an application of the other science courses that are offered at East. It is also great to see students excited about learning the content in forensic science.” Mrs. Seel also used to coach volleyball in her early years of teaching. She also sponsored the Forensics Club here at east, but as of this year she not sponsoring any extracurricular activities.

Outside of teaching, Mrs. Seel likes exercising, reading, and spending loads of time with her family. Mrs. Seel’s favorite part of teaching is interacting with students and preparing them for their futures. Her biggest achievement would have to be, preparing students for their futures and having them come back and share with me the impact that she had on them.

I personally approve of all these qualities Mrs. Seel presents. I have been taught by her for three years now and loved every minute of it. Class is never boring, she listens to everything you say, and overall puts maximal effort into everything she does. If you ever get a chance to have Mrs. Seel as your teacher just know that she is absolutely amazing and take in every moment of that class because she will make it very enjoyable.
