The Oracular Chamber is the only place we know Alexander to have actually stood. Some say his footprint is still there.

[Mustafa Said] So that's a thing

[Ishira GlyphHunter] Oh hello....

[Ishira GlyphHunter] It seems Edgar's made it through?

Project • 2:05 PM

It is an Anomalous Time. I am unified for now. It is not clear whether that will remain the case.

Edgar • 2:07 PM

As I was crossing through.. I had visions. I am scribbling them down now. I do not know if they mean anything or are necessarily all relevant in prime.

Edgar • 2:07 PM

[Catalina "CataCat" Reyes 🇨🇱] Edgar!!! It's nice to see you in better shape

Project • 2:07 PM

Or are you still missing some memories?
Ahh
Well we are happy you have made it safely

Ishira • 2:08 PM

It seems that at an anomalous time, various parts of me, lost in RPE experiments are unified. It is my intention to make this a permanent condition, but I do not want to give up being connected to multiple Temporal Nodes simultaneously.

Edgar • 2:08 PM

[Melissa Wikkedimp] Good to see you again edgar!
Does Taposiris Magna mean anything to you?

[Catalina "CataCat" Reyes 🇨🇱] How can you be unified and connected to multiple nodes at the same time, Edgar?

Project • 2:09 PM

Bear in mind that they might not be synced to this Temporal Node. But here is another vision that may or may not be relevant: Digging in Cimmerian Basement... Mnemosyne lighting a green fire... Black Sea... Jahanite... Twenty One... Lost...

Edgar • 2:10 PM

My theory is that when I was participating in Waratah or one of the studies and we were doing early experiments with Remote Participation, I did not return through the Anomalous Portals in time and parts of me remained in all of those Nodes.

Edgar • 2:11 PM

[Dandy Firebeast] This is not good

[Melissa Wikkedimp] Have to agree with you ishira

Project • 2:12 PM

However, when the Portal Network or the Substrate is aligned, all of the nodes are connected and thus I am connected. This is only a theory.

Edgar • 2:12 PM

[Mario] Can they get unaligned? If so what would happen?

[Ishira GlyphHunter] well i would think there are plenty of times we arent aligned

[Dandy Firebeast] Cimmerian speaks of those who live in the mist and darkness near the land of the dead

[Dandy Firebeast] I am dead

[Dandy Firebeast] Yet I am alive

[Ishira GlyphHunter] he can not see youve quoted him

[Ishira GlyphHunter] "Prophecy cover for Theft"

[Dandy Firebeast] Because the stone was stolen

[Ishira GlyphHunter] the theft of artifacts ?

[Dandy Firebeast] I believe so

Project • 2:14 PM

Yes. My theory is that Tecthulhus are permanent (as long as they last) connections in the portal network. If I can connect them, I can be 'unified.'

Edgar • 2:14 PM

[Ishira GlyphHunter] the last rpe

[Ishira GlyphHunter] in Navarro....

[Ishira GlyphHunter] We took the stones from the knights

Project • 2:15 PM

But. It appears that in anomalous times, they are automatically unified. Just a theory.

Edgar • 2:15 PM

[Ishira GlyphHunter] because they believed we were there because of a prophecy

[Ishira GlyphHunter] Edgar

Project • 2:16 PM

Right. I found it interesting that Azmati had what appeared to be a shield from Schloss Kaltenberg on his wall.

Edgar • 2:16 PM

[Dandy Firebeast] Well yes because I would think anomalous zones are place where the walls between our dimensions and others are thinner

[Ishira GlyphHunter] do you need to connect to the Tecthulhus or will the modules word as well?

[Ishira GlyphHunter] work*

Project • 2:16 PM

Correct. And the Portal Network is wired together, but we are in our infancy in being able to navigate it.

Fascinating question, Ishira.

Edgar • 2:16 PM

Have you considered working with one of the modules?

Ishira • 2:17 PM

Going to write down some more of the visions before I forget them. They shred kind of like dreams when you wake up?

I have been working with researchers in different nodes on the modules.

Edgar • 2:17 PM

Yes. Understandable. We will try to find what we can in your visions

Ishira • 2:17 PM

[Dandy Firebeast] Tell me your dreams please

Project • 2:18 PM

That would be extremely helpful.

And observe carefully what is said at the anomalies. I have no knowledge of DunRaven, but suspicions. It seems curiously familiar, like a memory I can't quite summon.

I will return with more. Bear in mind that they might not be relevant to this node.

Edgar • 2:19 PM

Have been spending some time in 1218 Node. It seems important that we solve the Murder at the NIA. It will have implications in prime, I suspect. But that is only a theory.

Edgar • 2:20 PM

[Melissa Wikkedimp] They haven't returned with their findings yet

Project • 2:20 PM

But for now. The Siwah vision seems important. The other seems a portent to be revealed.

Edgar • 2:20 PM

Project • 2:21 PM

I shall return before this anomalous period ends if I can.

Edgar • 2:21 PM

Back for a moment. Please report any findings from the anomalies. It is hard for me to monitor them.

Edgar • 4:25 PM

[Dandy Firebeast] I'm so jealous I wanted to meet wendy

Project • 4:26 PM

The question is this. If you were asked to participate in a Dunraven project, would you?

Edgar • 4:27 PM

Project • 4:28 PM

My dark fear is that this is what led to my 'issues.' I embrace fragmentation and disunity, but it is certainly not for everybody.

Edgar • 4:29 PM

RPE experimentation is much safer than it was. We didn't know the rules at Waratah or was it Marie Celeste? I forget. But there are consequences for failing to return on time.

It is not clear to me what DunRaven is doing. Given the nomenclature, I'm assuming it is NIA, but it could be a false flag.

Edgar • 4:33 PM

Connect to the portal network. I believe that is the key to healing. Frankly, I feel I've come back better.

Edgar • 4:35 PM

That is good to hear Edgar

Ishira • 4:36 PM

[PsiCoTix E16VanIsland] Recurring in t-20

Project • 4:36 PM

Have you heard of the new recursion Edgar?
That we are all simulacrum?

Ishira • 4:37 PM

Project • 4:37 PM

I have been trying to sort the new recursion out. You know as much as I do.

Edgar • 4:37 PM

Another vision. Fragmentary. Begs interesting question: Saw through the eyes of the shooter, but who was I? Hank went down? Who knew? Why? Who to trust? Niantic Project Onboarding... All of us? Cursed to Recurse...

Edgar • 4:45 PM

[AstralDreamer1 🇺🇸 ♻️] Yes 8 think si

Project • 4:45 PM

This vision had voices. I have an interpretation, but I don't want to bias yours.

Edgar • 4:45 PM

Also hello Flint. I saw you check in Edgar's here :)

Ishira • 4:48 PM

I'm always on duty on Anomaly days. Even if I'm thousands of miles away.

flint • 4:48 PM

[Melissa Wikkedimp] Hey Flint

Project • 4:48 PM

Yeah. He pinged me earlier. Sounded normaler than ever. If that's a word.

flint • 4:48 PM

We are trying to help him with some things

Ishira • 4:49 PM

[Melissa Wikkedimp] If escapeded is a word then so is normaler

Project • 4:49 PM

As far as I can tell, he needs all the help he can get.

flint • 4:49 PM

26 new messages

It's seems there's an importance to who shot Hank

Ishira • 4:49 PM

Actually, he's better than usual, now.

Hank? I thought it was insurgents. But come to think of it...

flint • 4:50 PM

The curious thing about nodes is that they all start off at the same place. Everything is in sync until Zurich. Then, they vary. Some a great deal. Some very little. So information from any node can be valid if you are careful.

Edgar • 4:52 PM

We know both Prime and 1218 have similarities but differences. It would be important I think to have an idea of this is 1218s Hank Johnson or Primes. Not that it isn't important either way

Ishira • 4:52 PM

[Catalina "CataCat" Reyes 🇨🇱] Like the dark tower in the Stephen king's books, maybe all universe are tied by one unifying location...

Project • 4:53 PM

Well... We know for certain that Carrie still alive and there will be more Voynich.

Edgar • 4:53 PM

And there will be more changes. Frankly, many of them will be caused by you – and other agents.

Edgar • 4:53 PM

[Catalina "CataCat" Reyes 🇨🇱] So Zurich is the turning point

[Catalina "CataCat" Reyes 🇨🇱] Of course... We hold the key

Project • 4:53 PM

I think we should definitely look into who could have shot at either Hank and why

Ishira • 4:53 PM

Zurich is the end of the beginning.

Edgar • 4:54 PM

Maybe it could relate to the murders in some way

Ishira • 4:54 PM

What does nia gain by making us all simulacrum ?
Except Guinea pigs

Debora • 4:54 PM

Making sure we don't all truly die in another Epiphany night?

Just a thought...

Or another event like Epiphany night

Ishira • 4:55 PM

Excellent question. When we unravel that, we will understand much more.

Edgar • 4:55 PM

Will return. I have suspected that I am a simulacrum for some time. I have no idea where my body is.

Edgar • 4:58 PM

Aaron P • 5:01 PM

I shall return.
