Learning Intention	Students will learn to use technical vocabulary within a written practical report. Students will learn the structure of a practical report.
Success Criteria	Students have demonstrated their understanding by writing a practical report featuring no less than five technical/scientific terms.
General Information/Class Note	Good morning year 10s, Today we will be looking at the technical/scientific terms that you will need to incorporate into your practical report. We will also be looking at the set structure of a practical report and its uses. I will be available in a google meets session throughout the lesson and expect you to check in with me before moving on to step 6. The meeting code is 10science2020.
	Please be aware that I will be recording this Google Meet for 2 reasons.
	1. So non-attenders can see what they have missed 2. So I can be totally transparent about my practice
	You can choose to turn off your camera when you are in the waiting room of the lesson. At the beginning of each lesson you will be asked to consent to the recording. If consent is not given you will be removed from the lesson and will need to access the recording once uploaded.
Lesson Checklist	Step 1. Read and respond to the class post on Daymap
	Step 2. Watch the PowerPoint presentation titled <i>Writing a Practical Report</i> (attached on Daymap).
	Step 3. Open and read through the document titled <i>Practical Report Word Bank</i> (attached on Daymap).
	Step 4. Open Google Drive (make sure you are signed in on your @mtbhs.sa.edu.au account).
	Step 5. Open the <i>Practical Report Template</i> (found in your Google Drive Shared with me section).
	Step 6. Begin filling out the details on the template and incorporate the technical/scientific language from the word bank.
