VARIATION 6

CAPTION:

More muscle + less fat with Emsculpt NEO.

20,000 powerful muscle contractions in one 30-minute Emsculpt Neo Treatment.

The technology provides a superhuman workout. The device causes muscles to contract. And, just like a workout, these contractions cause fibers to break down and rebuild themselves for bigger & stronger muscles.

The machine combines radiofrequency with high-intensity electromagnetic energy to stimulate powerful muscle contractions. Known as supramaximal contractions, these contractions work the muscles far more powerfully than the manual exercises performed at the gym. One 30-minute session produces the equivalent of 20,000 squats!

Countless benefits:

- ✓ Less fat, more muscle
- ✓ Build & strengthen muscle tone
- ✓ Melt away stubborn bulges
- ✓ Boost & tone for a non-invasive butt lift
- ✓ Sculpt thighs
- ✓ Painless
- ✓ Non-invasive & no downtime
- ✓ Natural-looking, long-lasting results
