

Heart Favor Cone

by craftjr.com

To celebrate this occasion of love, here is a favor cone with a heart shape on top. You can print the box template on the back of any printed / plain / colored paper to make your favor cones look however you want.

They are super simple to assemble, but do **highly recommend scoring the folds** before you start, because the bottom corner gets awfully tight. After that, just fold, glue the flap, and tie the hearts together on top with some ribbon.
