LDAP Org Unit Mappings Search Rules Exclusion Rules

Edit LDAP Org Unit Search Rule

Specify LDAP search rules, and an optional LDAP description attribute that contains a text description of the Org Unit.

Org Unit Description Attribute: Scope:
LDAP attribute (if present) describing the Org Unit

Rule:

Base DN:
(leave blank to use the Base DN from the "LDAP Connection" page)

OK Apply Cancel Test LDAP Query

The screenshot shows the 'User Accounts' configuration page in Google Cloud Directory Sync. The left sidebar contains navigation links: Google Domain Configuration, LDAP Configuration, General Settings, Org Units, User Accounts (selected), Notifications, Logging, and Sync. The main content area has tabs for User Attributes, Additional User Attributes, Search Rules (selected), and Exclusion Rules. A table lists search rules with columns: Active / Suspended..., Org Name/Org Map..., Scope, Filter, and Base DN Override. The first rule is 'Active' with a '[derived]' Org Name, 'SUBTREE' Scope, and a filter '(&(objectCategory=person)(objectClass=user)(mail=*)(!(userAccountControl:1.2.840.113556.1.4.803:=2)))'. The Base DN Override is 'OU=Student,OU=...'. Below the table, the 'Edit LDAP User Sync Rule' dialog is open. It contains the following fields and options:

- Import users that match this LDAP rule. For examples, click the "See Examples" link on the previous page.
- Place users in the following Google domain Org Unit:
 - ☒ Org Unit based on Org Units Mappings and DN
 - ☐ Org Unit Name:
 - ☐ Org Unit Name defined by this LDAP attribute:
- ☐ Suspend these users in the Google domain
- Scope:
- Rule:
- Base DN:
(leave blank to use the Base DN from the "LDAP Connection" page)

At the bottom of the dialog are buttons: OK, Apply, Cancel, and Test LDAP Query.

Hier vergebe ich ein Standard-Passwort. Wir verwenden momentan noch nicht Google Cloud Password Sync.

Alle Nutzer wurden erfolgreich in G Suite erstellt.
Danach habe ich einen Schüler von der 1a in die 1b verschoben.
Auch das hat GCDS erkannt und erfolgreich umgesetzt:
