

Privacy Policy

DocumentSummary Chrome Extension

Last updated: September 25, 2026

This Privacy Policy explains how DocumentSummary ("we", "us", or "our") handles information when you use the DocumentSummary Chrome extension.

DocumentSummary helps you summarize PDF, DOCX, and TXT documents using AI. The extension is designed to use only the information needed to provide document summarization, free-tier usage limits, PDF export, and product reliability.

1. Permissions Used by the Extension

DocumentSummary requests the following Chrome extension permissions and explains each one below.

storage

Used to store task state (file name, processing status, summary result), usage counters for free-tier limits, an installation identifier for rate limiting, a queue for analytics events, user preferences (selected summary mode and display language), and cached authentication data. All data is stored locally in Chrome extension storage on your device.

notifications

Used to alert you when background document processing is complete. Because summarizing large documents (up to 300 pages) can take up to 10 minutes, the extension tab may be closed or unfocused during processing. The notification lets you know the summary is ready without keeping the extension open.

tabs

Used to detect whether the extension page is already open in a browser tab. When you click a completion notification, the extension checks for an existing tab and focuses it rather than opening a duplicate. This permission is not used to read page content, URLs, or browsing history.

windows

Used to bring the Chrome window containing the extension page into focus when you click a completion notification. This ensures the summary result is immediately visible without you having to locate the correct window manually.

Host access: ds.ru.anytoolai.store

Required to send document text to the DocumentSummary API and receive the AI-generated summary. This host permission covers all core functionality: document summarization, authentication, usage limit checks, and analytics events.

DocumentSummary does not request: activeTab, scripting, history, bookmarks, cookies, webRequest, downloads, or broad host permissions beyond its own API.

2. Information We Collect and Process

2.1 Document text

When you ask DocumentSummary to summarize a file, the extension extracts text from the document you upload (PDF, DOCX, or TXT). This text is sent to our API at <https://ds.ru.anytoolai.store> to generate the summary and return it to you.

DocumentSummary processes only files you explicitly upload. It does not automatically read files from your device, browser history, or any website you visit.

Document text is not retained on the server after the summary response is returned.

2.2 Installation identifier

The extension creates a random installation identifier using the browser's cryptographic random UUID generator. This ID is stored locally in Chrome extension storage and is sent to the API to apply free usage limits and prevent abuse. It is not your name, email address, or Google account.

2.3 Summary result and task state

The generated summary, file name, selected mode (Short, Full, or Bullets), and processing status are stored locally in Chrome extension storage to preserve your session between uses. This data remains on your device and is not shared beyond what is needed to operate the extension.

2.4 Local preferences

DocumentSummary stores the following locally to preserve your settings between sessions:

- selected summary mode (Short, Full, Bullets);
- selected display language;
- installation timestamp and total use count.

2.5 Analytics and reliability events

DocumentSummary sends limited analytics events to our API at <https://ds.ru.anytoolai.store>. These events may include:

- extension installed, popup opened;
- file uploaded (file type and size, not content);
- summary mode selected, summary generated, PDF exported;
- API error status and error type;
- extension version, Chrome version, OS category;
- session ID, hour of use, free plan status.

These events are used to diagnose failures, measure usage limits, and improve reliability. Document text is never included in analytics events. No third-party analytics service is used in the current version.

2.6 Authentication

DocumentSummary supports optional account login to access paid features. If you log in, an authentication token is stored locally in Chrome extension storage and sent with API requests to verify your subscription status. Email addresses and passwords are not stored by the extension.

3. How We Use Information

We use information collected or processed by DocumentSummary to:

- generate AI summaries of documents you upload and return them to the extension;
- export summaries as PDF files on your device;
- enforce usage limits and prevent abuse;
- display remaining free usage;
- diagnose API and network errors and improve reliability;
- respond to support or feedback requests;

- comply with applicable legal obligations.

We do not use document text or usage data for personalized advertising, retargeting, interest-based advertising, or sale to third parties.

4. How We Share Information

DocumentSummary shares information only as needed to provide and support the extension:

- with our API service at <https://ds.ru.anytoolai.store> to process summarization requests, usage limits, and analytics events;
- with infrastructure providers that host or operate the API service;
- when required by law, legal process, or to protect the security and integrity of the service.

DocumentSummary does not sell your personal information.

5. Local Storage and Data Deletion

You can remove locally stored DocumentSummary data by:

- clearing Chrome extension storage in your browser settings;
- uninstalling the extension from Chrome.

For deletion of data stored on our servers (analytics logs, rate-limit records), contact us at the address below.

6. Data Retention

Local extension data is retained until you clear it or uninstall the extension. Document text sent to the API is discarded after the summary is returned and is not retained on the server. Server-side records — including API logs, analytics events, and rate-limit data — are retained only as long as reasonably necessary to provide the service, maintain security, prevent abuse, and comply with legal obligations.

7. Security

All data transmitted to the API uses HTTPS. We apply technical and organizational measures intended to protect information from unauthorized access, disclosure, alteration, or destruction. No internet transmission or storage system can be guaranteed completely secure.

8. Children's Privacy

DocumentSummary is not directed to children under 13. We do not knowingly collect personal information from children under 13.

9. International Processing

Your information may be processed in countries other than your country of residence, depending on where our infrastructure operates.

10. Changes to This Privacy Policy

We may update this Privacy Policy from time to time. If we make material changes, we will update the "Last updated" date at the top of this document. The current version is always available at the URL provided in the Chrome Web Store listing.

11. Contact

If you have questions about this Privacy Policy or want to request deletion of data stored on our servers, contact us at:

u7462036261@gmail.com

12. Chrome Web Store Limited Use Disclosure

DocumentSummary uses Chrome extension permissions and user data only to provide or improve the extension's single purpose: summarizing documents, exporting summaries as PDF, enforcing usage limits, and maintaining extension reliability.

Document text is sent to our API only when necessary to provide the user-requested summarization feature and is discarded after the summary is returned. DocumentSummary does not use or transfer user data for personalized advertising, retargeting, interest-based advertising, data brokerage, or unrelated profiling. User data is transferred only when necessary to provide or improve the extension, maintain security, prevent abuse, comply with law, or complete a user-requested action.
