

Subject: Support the S.2233 Youth Poisoning Prevention Act in Memory of Jared Michael Coursen

Dear Senator [Last Name],

I am reaching out to ask for your support of the **S.2233 Youth Poisoning Prevention Act** to prevent the tragic loss of young lives to toxic substances like sodium nitrite. Our community recently lost Jared Michael Coursen, forever 21, a young man full of kindness and promise, whose life ended by sodium nitrite ingestion. The heartbreaking ease of access to such high-concentration, lethal substances is something no family should face.

The Youth Poisoning Prevention Act would classify consumer products with 10% or more sodium nitrite by weight as hazardous, restricting individual access. Additionally, we believe in the critical need for emergency responders, parents, and community members to be informed about **methylene blue**—a known antidote for sodium nitrite poisoning. Raising awareness of this treatment could save lives in emergency situations when every second matters.

In Jared's memory, please consider endorsing S.2233 to protect our youth, support emergency preparedness, and prevent other families from enduring similar tragedies.

Thank you for your time and consideration in supporting this vital legislation.

Sincerely,
