## Robot 1 - Checklist

| ☐ Visual Mechanical Inspection (Damage/loose parts/loose             |
|----------------------------------------------------------------------|
| chains/Axles & Collars)                                              |
| ☐ Drivetrain and Swerve Modules                                      |
| ☐ Rotate all Swerve Modules in both axes                             |
| ☐ Check motors secure and temp (8 motors)                            |
| ☐ Check Wheel Tread                                                  |
| Check for FOD (Foreign Object Debris and Damage)                     |
| ☐ Shooter + Kicker                                                   |
| ☐ Check motors secure and temp (2 on shooting wheels + 2 on pivot    |
| + 2 for kicker wheels and tubes)                                     |
| ☐ Check belts                                                        |
| Check gears (pivot and for running the wheels)                       |
| Check shaft collars screws (ends of shafts, sector gears, plates, on |
| plastic roller tube)                                                 |
| ☐ Intake                                                             |
| Check motor secure and temp (1 motor)                                |
| Check shaft positions, screws, and shaft collars                     |
| Check chains and sprockets (including tension)                       |
| Check centering wheels and bearings                                  |
| ☐ Check silicone condition                                           |
| □ Climber                                                            |
| ☐ Check motor secure and temp (2 motors)                             |
| ☐ Check string                                                       |
| ☐ Check hooks secure                                                 |
| ☐ Wipe off ALL wheels with a rag and isopropyl alcohol               |
| ☐ Intake                                                             |
| □ Shooter                                                            |
| □ Record any problems and fixes                                      |

## Robot 2 - Checklist

| ☐ Check electronics                                                |
|--------------------------------------------------------------------|
| ☐ Light tug test all connections                                   |
| ☐ Inspect for damage                                               |
| Check everything plugged in fully/correctly                        |
| lue Check zipties on bellypan $ ightarrow$ they have been breaking |
| ☐ Check encoders for damage                                        |
| ☐ Check encoder boards on Spark Maxes to ensure they               |
| are fully seated and secure and wires are secure                   |
| Check all Anderson connectors have locks in place                  |
| Check that robot side of battery mount is secure                   |
| Check that RoboRio tape is in place                                |
| □ Bumpers                                                          |
| Check for bumper damage and repair with correct color              |
| gaffers tape                                                       |
| Swap bumpers for next match                                        |
| □ Chassis                                                          |
| ■ No tools left in the bot                                         |
| ☐ Record any problems and fixes                                    |

## Robot 3 - Checklist

| ☐ Place Driver Station on Charger                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                      |
