

# Qatar currency

The name of the currency (money used) in Qatar is the **QATARI RIYAL**

1 Qatari Riyal

25c or £0.25

0.25 is equivalent to  $\frac{1}{4}$

what is a good way of calculating  $\frac{1}{4}$  of a number?

Halve..... then halve again!

halve...

...halve again  
eto

| Qatari Riyal (ريال) |     | British pounds (£) |
|---------------------|-----|--------------------|
| 1 ريال              | 0.5 | £0.25              |
| 10 ريال             |     |                    |
| 20 ريال             |     |                    |
| 100 ريال            |     |                    |
| 24 ريال             |     |                    |
|                     | 36  |                    |
|                     | 15  |                    |
|                     |     | £52.00             |
|                     |     | £12.25             |
| 1784 ريال           |     |                    |

**CHALLENGE** : Have a look at other currencies. What is the relationship to the

£?
