

# Terms of service

By commissioning me, you agree with the following terms and conditions.

## Contact

First, you must be over 18 years old to commission me.

You can contact me via messages on Furaffinity or via email [raweart1@gmail.com](mailto:raweart1@gmail.com). If you are applying for commissions and you are selected, please send me a message on Furaffinity or an email with the summary of your ideas and what kind of commission you would like.

Reference sheets and reference images are welcome, especially if you have something specific about the character, scene, location, props etc.

For faster and more convenient communication, I might ask for Discord (preferred) or Telegram contact, though it isn't a necessity when applying for commissions. If that's the case, we will stay in touch on email or via Furaffinity's messages.

You have time to send a message with the details before I reach you in line. If I reach you and I haven't got the details still, I will contact you again for the necessary information. If I still haven't received any message with information, I will move to the next in queue, after that I will move back to you. If I have finished everyone in queue and still haven't got your email or message on furaffinity, I will cancel your commission.

## Working method

During a work process, you will get previews of your commission to make sure that the work stays close to your wishes and ideas. If I missed something, be sure to tell me immediately, before I move to the next phase, so I can make the necessary fixes and additions.

If you do not specify something, you are giving me free reign as an artist. I am willing to change the image/scene drastically once before I start to refine the scene – for example pose a character in a different way or from a different angle of view.

In case of animation and there are any changes, I can only do minor changes, like simple pose changes. Please be sure that the animations are satisfactory before I move on to animation refining and physics. For any further radical changes, I will charge you an extra amount of payment. Please try to be precise with your description. Do not be shy with the details. If I overlook or misunderstand something, do not hesitate to tell me, that's my fault and I'll make the fixes with no extra payment charged.

When I finished your commission and I got the payment for it, you will get the picture in PNG format, in a 2K resolution. If it is a video, it will typically be provided in full hd. For request, I can send the project file.

## **Payment**

Exceptionally complex characters or scenes will increase the price of the image/animation. Before I start working on the commission, we'll settle for the price of the work.

I accept payment only via PayPal invoice. My main currency is the Euro (EUR) and I accept money only in this currency. You can easily transfer money from whatever currency you use to EUR via the payment option on PayPal.

The invoice will contain the deadline of the payment, please try to hold yourself to that date, if you can't send it any earlier. I send you the invoice after I finished the early blockout and I showed a preview for you and you were satisfied with the plan. The payment can be delayed or partially refunded if an unpreventable emergency happened after I started the commission, but otherwise, be prepared to pay for what you ordered. Failing to pay for the commission in time can result in future black-listing.

## **Cancellation and Refund**

As the artist, I reserve the right to refuse, reject or cancel your commission at any stage, if I feel to do so, without any further communication. Cancellation can be requested any time before I start the work. If I already started the commission, but you cancel it, I'll partially refund your money based on the project status. Same will occur if you break any rules or your behavior is not acceptable for working together. Commissions that have reached a certain point in the process or is completed will not be refunded.

If the cancellation is my fault, you'll get a full refund.

## **Completed Work Usage**

I allow you to post the finished picture to your own gallery/site as well as cropping it into avatars/icons, but you must always credit me in any case. I do NOT allow posting the picture in its original resolution or in any bigger size than the resized picture I send to you. The same applies for the model as well as no reselling of models in any way, form or shape. If I come across the break of this rule, I will request the removal of the picture or model. If the person fails to do this, the result is being black-listed from future commissions.

Please respect my rights as an artist and give credit where due. All artwork/work I create is copyrighted to me so cite me explicitly. I own the distribution rights. You may not resell or redistribute my art/work without my consent. It also includes if you sell your character. I do prefer if art is done of your character for you, is yours alone and is not transferred to the new character owner.

Any use of my work for NFT, cryptoprojects is not allowed. Any representation of my work in any field that can be or is associated with cryptocurrency/NFT/Blockchain in any form is not permitted. You may not use my work as well as commissions you have paid for in any aforementioned scenarios. If my work is used by a commissioner for money laundering purposes or any other illegal activity, I will report you to your local authorities.

As the artist, I retain the right to display the completed artwork on any personal gallery, site or journal and use it as an example for future work. I do not take completely private commissions; however, if the commission will be a gift, I can delay the public showcase for request.

I maintain the right to use the completed artwork to create prints or merchandise etc, but I will always ask permission to do this from the commissioner.

If you want to edit or modify my work, ask for permission before you do it!

If you have any further questions, don't hesitate to send me a note or an email! ^^
