

VISION AND GOAL

The Carver Elementary School Library Program strives to provide a supportive and collaborative learning environment where students and staff feel safe and respected. Our goal is to provide equitable access to a curated collection of quality materials that support curriculum instruction and individual reading interests in which every child is represented regardless of socioeconomic status, race, or ethnicity. We do this by collaborating with the [Media Advisory Committee](#), to create a school library collection management plan that adheres to [Wake County Public School's Policy 3200](#) while focusing on supporting academic achievement and outcomes for every student.
