Upload both your answers to your blog. Take a screenshot of your maths book with your working out and write down what strategies you used to solve these problems. Fill in the maths blog log when done.

1. There are 49 jellybeans in a jar to be shared equally among a group of people. If each person eats 7 jellybeans, how many people are there altogether?

2. There are 28 children in Miss Wild's class. She has 4 maths groups with an equal number of children. How many children are in each group?

3. Cody has 3 boxes of trading cards. He has sorted them and has 29 cards in each box. How many trading cards does he have in total?
