

Agenda Discussion:

1. How about adding links to a youtube playlist of Galaxy tips and tricks (different from tutorial videos)
 - a. Galaxy project channel with videos from markdown less than 3 minutes . E.g. Create new history, delete datasets ...
 - b. Could also be integrated as Snippets in tutorials?
 - c. Jen prefers screenshots for teaching - GTN can embed both video/screenshots for users.
2. Create a tag system for easier updates (In the GTN and on youtube) :
 - a. Eg: galaxy version, history/workflow . That way, no need to update the video if the interface didn't change much, it's easy to find which video contains elements that changed. (possible to apply to images in the future?)
 - i. Maybe we should use playlists for this? E.g. playlist per video/component, and then all of the different galaxy versions within that playlist.
 - b. Best practice for this : ontology trees? dictionaries?
3. Optional : How about creating a video to introduce to GTN materials, what it is, why contribute, where to start, to share to people who don't know about GTN but might be interested.
 - a. Yes, we want this
4. Navigation in GTN for users : ToC of tags, add user questions to metadata and have a FAQ pointing to them (How to free space, etc)
 - a. Add more tags everywhere, and have tags findable from main page (users don't always know rna seq is in transcriptomics for example)
 - b. Overview for topics, what is it about, what tags are contained in the topic,
 - c. Tag versioning
5. Support older versions of galaxy
 - a. GTN : update to newer versions, the automatic snippets updates will help, we can point to versioned older versions
 - b. Cloud, the version of galaxy on it may be older than 1 year old, should we include older versions in GTN for it, or push for updating the cloud version for each release?

Action items

- Snippet listing/overview that might be easy to link to. @ gtn
- People to include in the discussion : [Beatrice Serrano](#) in freiburg, [Oleg](#), [Alex](#) O.
- In welcome page : carousel with tip of the day ? Link to tips gtn page/videos
- Bea is doing videos for tools/highlighting features. Coordinate with her. [Mentioned in the previous month's minutes.](#)
 - [Here](#)
- Saskia has a welcome slide deck from a while back? We should turn this into a video or so.
- Helena - tag archive versions with specific galaxy release

- Jen will take faq to google doc, and share. We can discuss what gets added/removed/linked to.
