

GetYourGuide <-> Ibis Integration Guide

In order to connect your product from Ibis to the GetYourGuide platform, please follow these steps.

1. Register/Sign in to our Supplier Administration tool

This tool can be found here: <https://supplier.getyourguide.com/>. If you already have an account, please make sure you are signed in. If not, click on 'Apply to be a Supplier' and follow the steps.

2. Identify/Create products you would like to connect

From the above portal, you should be able to manage any existing products listed on GetYourGuide. If the product(s) you want to connect are not created on GetYourGuide yet, please create them.

3. Connect products via API

Follow [this guide](#) to see how to connect a product listed on GetYourGuide, to your product in the Ibis system.

- a. Under 'Booking System', please select 'Ibis'
- b. Under 'Product ID', please see the [next step](#) for how to generate this value using the [generation tool](#)

4. Generate 'Product ID' value

Use [this tool](#) to generate a Product ID. You will need the following information:

- a. **Ibis System Code:** This is the code indicating which Ibis system you are using. (This is **not** the operator code) [See screenshot below for how to find this value.](#)
- b. **Ibis Product Code:** This is the 'Product Code' of your item in the Ibis system. [See screenshot below for how to find this value.](#)
- c. **GetYourGuide Category Codes:** You will need to specify how the categories on GetYourGuide connect with the price options on Ibis. For example, if your product listing on GetYourGuide supports both Adult and Child tickets, you will need to tell us which of your Price Options should be used for each ticket. Please identify the GetYourGuide categories you are using.
- d. **Ibis Price Option Codes:** Similar to the item above, you will need to know the 'Option Code' of the 'Price Options' on Ibis that you wish to connect. [See screenshot below for how to find the values on the Ibis side.](#)
