

Photography Self-reflection - Megan Edlin

Liter - Rubric score 5

In the space below, identify your strengths as identified on the rubric. Which criteria do you feel as though you met or excelled in?

I think i did a great job at finding garbage that is photogenic, but still looks like garbage unlike other people's photos that look like the garbage is perfect.

In this space, explain what criteria you think you could have done better in. What is NOT good about your photo(s)?

I think i could have had a bit more variety with where i shot my photos just to have a more diverse submission.

Finally, what will you do differently in the future? What ideas or other directions might you take on future projects considering your experience with this one?

I like how with this assignment we are taking something hideous like garbage and turning it into something beautiful, so i think i can use that composition experience in the future.

Level	Quality Photography Rubric
Mastered 5	<ul style="list-style-type: none">• Subject matter is impactful / is the focal point• Applicable lighting• best possible contrast• cropping and appropriate editing (not over-edited)• correct exposure• clarity and crisp focus• uniqueness, creativity• composition - rule of thirds,• bending the rules, making it look intentional

4.5	Exhibits characteristics of both 4 and 5
<p>4</p> <p>Almost Mastered</p>	<ul style="list-style-type: none"> ● Explain what you could improve upon..
<p>3.5</p> <p>QW</p>	<ul style="list-style-type: none"> ● Explain why you chose your particular subject or process.
