## Feedback from the Academic Assessment Committee

2020-2021 Report

The goal of the committee's feedback is to provide suggestions that it believes will strengthen your assessment work. It is not intended to be evaluative or punitive.

Program Name:	]	Program has a curriculum map in their assessment folder?	Yes	No
Reviewer Group No.:				

Place X here if this report is "Plan-Only" (i.e., a new program that does not yet have data to report)

Closing the Loop on Previous Assessment  Actions that were taken and results of those actions  Program Student Learning Outcomes  Student learning outcomes are clear  Student learning outcomes describe desired knowledge, skills, and dispositions of students  Student learning outcomes are realistic, measurable, and actionable  Data Collection, Evidence, and Criterion  Description of evidence is provided and aligns to SLOs  At least one direct piece of evidence is provided as support  At least one direct piece of evidence is provided as support  Data collection (quantitative/qualitative methods) yields relevant data about student learning (method aligns with data needed; data provides insight into student learning, i.e. not # of internships, not # graduation rates, etc)  Description of sample selection is provided along with sample size  Criterion/target is provided, realistic, and specific for successful attainment of SLO  Findings Reported and Analyzed  Data are provided and summarized with respect to criterion (How do the data compare to the desired level)  Findings are supported by data collected and analysis is clear  A description of the significance and implication of the findings to the program is provided  Future Actions	A = Addressed P = Partially Addressed N = Not Addressed	Α	Р	N	Comments
Program Student Learning Outcomes  Student learning outcomes are clear  Student learning outcomes describe desired knowledge, skills, and dispositions of students  Student learning outcomes are realistic, measurable, and actionable  Data Collection, Evidence, and Criterion  Description of evidence is provided and aligns to SLOs  Method to evaluate evidence is summarized or uploaded into the supporting documents folder  At least one direct piece of evidence is provided as support  Data collection (quantitative/qualitative methods) yields relevant data about student learning, i.e. not # of internships, not # graduation rates, etc)  Description of sample selection is provided along with sample size  Criterion/target is provided, realistic, and specific for successful attainment of SLO  Findings Reported and Analyzed  Pindings are supported by data collected and analysis is clear  A description of the significance and implication of the findings to the program is provided	3	Comments
