Text Label
Text Label Container

Symbol Properties

Property	Type	Description
Text Label	String	Unique identifier within the contentarea.

Documentation Properties

Property	Type	Description
Text Label	U*ia*ML path	The Text Label part of the U*ia*ML path has to be identical to the one used by the Symbol Property.
Intended Content	String	Description of the text (but not the actual text itself) that is represented by this text label.

Explanation
The Text Label element is a contentarea element (CAE) that represents a text, which can be a single character or a long story. The Text Label container can hold other CAE's. Placing CAE's into the container indicates that the CAE's are meant to be grouped.
