Serafim S3: The World's First Adjustable Ergonomic Cloud Gaming Controller

The gaming market is continuously evolving, and there are increasingly diverse ways for consumers to interact with it. With the rise in engagement and the growing number of players, game revenue is expected to significantly increase in the coming years, which is the current trend in the entire market. This year, global gaming market revenue is projected to reach \$159.3 billion and is estimated to exceed \$200 billion by the end of 2023. By the end of this year, there will be as many as 2.7 billion gamers worldwide, with 2.5 billion playing mobile games, 1.3 billion playing PC games, and 800 million playing console games.

After two years of development, the Serafim team has created the Serafim S3 cloud gaming controller. It combines the Serafim Console software and the hardware of the Serafim S3 gaming controller, allowing players to enjoy console-level gaming experiences anywhere, at any time. This gaming controller features a customizable design, ergonomic grip, and a comprehensive software interface, enabling players to upgrade to a home gaming console experience using just their mobile phones. This adjustable ergonomic gaming controller is currently unparalleled in the market and, paired with patented ergonomic design, offers a unique gaming experience like no other!

Product Features of Serafim S3 Cloud Gaming Controller:

1. Equipped with a 360-degree Hall-effect magnetic induction joystick, drift-free, with no dead zones.

2. Supports direct charging and phone fast charging mode, allowing you to play and charge simultaneously, eliminating the worry of running out of battery during play.
