UNIVERSA
International Journal of Socio-legal, Economics, Science and Educational Technology

Volume 1, Issue 1, January 2026

English Title

Indonesian Title/ Arabic Title (Opsional for Foreign Author)

Author*[1] Author[2] Author[3]

Institute name, City, Country [1 2]
Institute name, City, Country [3]

**Corresponding Author: email@gmail.com*

Submitted : 1 January 2026	*Revision : 1 January 2026*	*Accepted : 1 January 2026*

Abstract

Articles must follow the author guidelines. The **Article title** must be written in English, consist of a maximum of 15 words, and be able to concisely and clearly reflect the main theme and scope of the article. Avoid using initial words like *"Study," "Research," "Analysis," or "Development,"* unless they are truly necessary for clarity of meaning. The **Abstract** is written in 2 languages (English and Indonesian/Arabic). The abstract should provide an overview of the article's content and should be approximately **130 words** long. It is recommended that the abstract be written following a narrative flow: starting with a surprising or thought-provoking contextual statement, followed by a formulation of the research objectives, a brief explanation of the methods used, and concluding with the main findings or significant contributions of the study. **Keywords** must consist of five words, reflecting the core theme, essential concepts, or methodological approach used.

Keywords: First; Second; Third; Fourth; Fifth

Abstrak (Arabic/Indonesian is Opsional)

Artikel harus mengikuti panduan penulis. **Judul artikel** harus ditulis dalam bahasa Inggris, maksimal terdiri dari 15 kata, dan mampu mencerminkan secara ringkas serta jelas tema utama dan ruang lingkup artikel. Hindari penggunaan kata awal seperti *"Kajian," "Penelitian," "Analisis,"* atau *"Pengembangan,"* kecuali jika memang diperlukan untuk kejelasan makna. **Abstrak** ditulis dalam 2 Bahasa (Inggris dan Indonesia/Arab). Abstrak harus bisa memberikan gambaran terkait isi artikel, selayaknya ditulis dalam **130 kata**. Penulisan abstrak disarankan mengikuti alur naratif: dimulai dengan pernyataan kontekstual yang mengejutkan atau menggugah, diikuti oleh rumusan tujuan penelitian, penjelasan ringkas metode yang digunakan, serta ditutup dengan temuan utama atau kontribusi penting dari studi tersebut. **Kata kunci** harus terdiri dari lima kata, mencerminkan tema inti, konsep penting, atau pendekatan metodologis yang digunakan.

Kata Kunci: Pertama; Kedua; Ketiga; Keempat; Kelima

INTRODUCTION

The introduction must be written in a concise, focused, and issue-driven manner, avoiding verbose or unnecessary elaboration. Authors are advised to compose the introduction as four to six, coherent, and logically structured paragraph, following this narrative flow: begin with a crucial issue or phenomenon relevant to the field of study, preferably presented as a social fact or shocking statement to capture the reader's attention. Next, the author must provide a strong literature review, citing at least seven previous studies, preferably from Scopus-indexed journals, to establish the study's position within a credible academic framework. This review should aim to build the scientific context, highlight the research gap, and avoid redundancy. After this, the main objective of the study should be clearly stated. The paragraph should conclude by presenting the theoretical assumptions, central argument, or research hypothesis that will be examined or elaborated upon in the article. The writing must maintain argumentative coherence, avoid superficial or disjointed citations, and clearly demonstrate the connection between the background problem, the literature context, and the study's contribution.[1]

Method

The methodology section of this journal is designed to provide a clear overview of the research approach used, including the type of research, data collection techniques, and the analytical methods applied. Researchers should briefly and systematically explain whether the study is qualitative, quantitative, or mixed-methods, followed by a description of the primary and/or secondary data sources, the instruments or tools used for data collection, and detailed procedures to ensure replicability. Additionally, the data analysis methods (such as statistical analysis, content analysis, or modeling techniques) should be clearly outlined to strengthen the validity and reliability of the findings. This guide also emphasizes the importance of explaining the research's limitations and scope so readers can fully understand the context of the methodology employed.[2]

RESULTS AND DISCUSSION

First Chapter

Mini Subchapter (if needed)

The results and discussion section of this journal is designed to present research findings systematically and interpret their meaning by emphasizing deep insights rather than raw data alone. Accepted manuscript types include original research papers as well as in-depth theoretical analyses or critical reviews, with a length of 5,000 to 7,000 words, including references. Researchers are encouraged to logically combine the results and discussion sections, linking findings objectively to the research question and previous studies using neutral and precise language. Data presentation may be supported by relevant tables or figures, with a maximum of one per page and a width not exceeding two-thirds of the page, each accompanied by a clear caption. The primary focus of this section is critical analysis that explains the contribution of the findings to the relevant field, enabling readers to grasp the value and implications of the research comprehensively.

---

[1] Use a reference manager tool to make citing easier, use the Chicago Manual of Style 17th (fullnote) style, and references in the form of articles must include the doi number.

[2] In this section, use citations from articles and books that specifically discuss particular methods or approaches relevant to your data and research.

See: Qur'an Surah Al-Ahzab [33]: 56

اِنَّ اللّٰهَ وَمَلٰۤىِٕكَتَهٗ يُصَلُّوْنَ عَلَى النَّبِيِّ ۗيٰٓاَيُّهَا الَّذِيْنَ اٰمَنُوْا صَلُّوْا عَلَيْهِ وَسَلِّمُوْا تَسْلِيْمًا ٥٦

For Quranic verses, prophetic hadiths, and other Arabic texts, use the Sakkal Majalla font size 16pt, then align them to the right.

Second Chapter

The results and discussion section of this journal is designed to present research findings systematically and interpret their meaning by emphasizing deep insights rather than raw data alone. Data presentation may be supported by relevant tables or figures, with a maximum of one per page and a width not exceeding two-thirds of the page, each accompanied by a clear caption. The primary focus of this section is critical analysis that explains the contribution of the findings to the relevant field, enabling readers to grasp the value and implications of the research comprehensively.

Table 1. Religious Moderation

Source: from author/ https:theosinesi.ac.id

The guideline for table presentation in this journal requires each table to be numbered sequentially, with a clear title placed immediately below the table number. After the table is presented, the data source must be cited appropriately beneath the table. If the table has been compressed into an image, the image must be of high resolution to ensure that details and data readability are well maintained. Tables should be placed in accordance with the context of the discussion and should not exceed two-thirds of the page width to maintain a neat and easily understandable layout.

Third Chapter

The results and discussion section of this journal is designed to present research findings systematically and interpret their meaning by emphasizing deep insights rather than raw data alone. Accepted manuscript types include original research papers as well as in-depth theoretical analyses or critical reviews, with a length of 5,000 to 7,000 words, including references. Researchers are encouraged to logically combine the results and discussion sections, linking findings objectively to the research question and previous studies using neutral and precise language. Data presentation may be supported by relevant tables or figures, with a maximum of one per page and a width not exceeding two-thirds of the page, each accompanied by a clear caption. The primary focus of this section is critical analysis that explains the contribution of the findings to the relevant field, enabling readers to grasp the value and implications of the research comprehensively.

Figure 1. Ancient Manuscripts

Source: from author/ book of theology/ https:theosinesis.ac.id

The guideline for including images in this journal requires each image to be presented in high resolution to ensure clarity and preservation of visual details. Every image must be numbered sequentially, with the number placed directly below the image, followed by a brief caption that explains the content of the image. After the image number and caption, the source of the image must be clearly cited according to the applicable format. Image placement should be relevant to the context of the discussion and maintain a neat layout that is easy for readers to understand.

CONCLUSION

The conclusion section of this journal should be written clearly and concisely, and not merely as a summary of the results and discussion. The conclusion should present the key findings that form the core of the research, as well as the main contributions made to the relevant field of study. Additionally, this section briefly highlights the weaknesses of the research to provide an objective overview of the study's quality. Finally, the conclusion ends with recommendations for future research as guidance for further development of knowledge. The conclusion should be written without including references or citations to maintain focus on the essential insights and final outcomes of the study.

BIBLIOGRAPHY

The bibliography section of this journal must include a minimum of **30 scholarly sources** used in the writing, with at least 70% coming from peer-reviewed journals or reputable academic books. Authors are required to use Mendeley for citation management, following the **Chicago Manual of Style 17th edition (full note)** format. Citation usage should be proportional and relevant, avoiding excessive self-citation and unnecessary regionally focused references to maintain the quality and objectivity of the sources in the scholarly work. The bibliography should be organized neatly and consistently according to the specified format to facilitate verification and ease of reading by both readers and reviewers.
