

SI: I just blown my account 

This is a typical phrase 2024 traders are spreading over social media.

thousands of beginners are blowing their accounts in seconds as if it was

Is the trading market becoming more complicated than it is ?

Definitely not.

I have been winning in the market with the made for the past 3 years and let me tell you something...

Trading has not been as easy to start as now.

Why?

Because 5 years ago, to become a trader you had to build and backtest your strategy yourself (which is a lot of time and money consuming )

While now you just have to learn someone's strategy he has been using for years and start trading with it.

But yet they keep blowing more and more accounts and keep saying the market is against them.

Why do they keep losing?

Ask them the following questions

- Do you master your emotions and are rational on every single trade you take?
- Do you respect your strategy 100% without no external thought?
- Do you keep track of your trades and analyze them properly?

Just missing on a single point in these list may be the cause of your failure in trading...

and be certain that most of losing traders lack not just one but plenty of important things to master before trading.

This is why I created the ict trading mastery with more than 2000 students right now...

Learning how to avoid falling into the market traps(anxiety trades or strategy problems)...

Learning how to master their emotions and trade with a winning strategy I have been using for years provided to them

If you want to skip steps by avoiding losing as 90% of 2024 traders, then you need the ict trading mastery
