Schoology...a district online tool for learning

September 2024

Dear Parents and Guardians,

As a district, we will continue to use Schoology as a learning platform. While we will not be sending individual computers home with each student, we will be using Schoology in the classroom to reinforce skills and concepts. Schoology allows students to experience an online learning environment as well as to create a profile under my supervision. Use of this program directly ties to the district's goals of teaching Internet safety and digital citizenship. Students may be participating in accessing documents (homework, various handouts, etc.) and viewing a class calendar. Students will be expected to follow the basic use guidelines for the district's computer network and the Internet.

Parents can access their students' information through the Schoology Parent Portal. While signed in, you can view as any student you are associated with in the district. Once your account is created you will receive an email from Schoology with login information(please also check your spam folder). The username is the email address that you provided during registration. Please check out our Schoology Parent Portal tutorial for step by step instructions by using the link below.
