

## Dear Parents and Guardians,

To help your child stay sharp and avoid summer learning loss, we are excited to share that **Progress Learning** will be available to all students over the summer break!

**Progress Learning** is a fun, interactive online platform that supports learning in math, reading, social studies, and science. It can be accessed from any device with a web browser, including laptops, tablets, and smartphones. No app is required—just go to <https://app.progresslearning.com/login>.

[Insert detailed login instructions here].

## Here's how you can help your child use Progress Learning at home:

**Stick to a schedule.** Encourage your child to follow a weekly routine. For example:

**Monday:** Work for 30 minutes in your Study Plan. *K-5th grade students try to earn 3 Galaxy Stars to show mastery on a standard. 6th-12th grade students work toward turning at least 1 yellow dot or 1 pink dot into a green dot to show mastery on a standard.*

**Tuesday:** Complete practice with videos in your Study Plan for two standards. Write a reflection on what you learned for each video.

**Wednesday:** Take a practice test in your Study Plan and review any questions answered incorrectly. The results can be found in your Graded Work.

**Thursday:** K-5th grade students complete work in Skills Practice for 20 minutes. 6-12th grade students work to earn 5 tokens and celebrate in the Game Arcade.

**Support goal setting.** Have your child choose learning goals for the summer and track their progress.

**Use Liftoff.** If your child is in grades 2-8, Liftoff helps address gaps in reading and math. Look for the Liftoff icon on their dashboard.

**Make access easy.** On iPhones or iPads, add a shortcut to your home screen for quicker logins.

Your involvement makes a difference! Let's work together to keep learning going strong all summer! If you have any questions about how to support your child, [insert contact information here].

Sincerely,

[Your Name]

[School/Grade Team]
