

### Medical Website Critique:

- Good websites:

<https://drpimplepopper.com/>

I like how easy it is to consume content on the page, and how easy it is to navigate throughout the page. There is also imagery to get a picture of what the website is about.

<https://www.dhcs.ca.gov/>

I like how there are icons for each subject / topic you want to search for and everything you need is listed and easy to navigate through.

- Not-so-good websites:

[https://leaa.io/index.html?gclid=Cj0KCQjw8NiBhDOARIsAHzpbLBerXcA3Hp0zKFuFhzkhNlpEWvNz3DRfXnDJIBoS5MFje7Z2S\\_REL0aAhcLEALw\\_wcB](https://leaa.io/index.html?gclid=Cj0KCQjw8NiBhDOARIsAHzpbLBerXcA3Hp0zKFuFhzkhNlpEWvNz3DRfXnDJIBoS5MFje7Z2S_REL0aAhcLEALw_wcB)

The front page image is very centered and empty. When you scroll down the page, the words look compressed and slowly fade onto the screen.

<https://sffc.org/>

The website feels too cramped in the center of the page, and there are no icons, and the pages are really short.
