TEST 3

1. Прочитайте текст та перекладіть:

He also discovered the Law of Universal Gravitation which states that "every particle of matter is attracted by every other particle of matter with a force inversely proportional to the square of their distance apart". Newton applied the principle of gravitation to prove that the power which guides the moon around the earth and the planets around the sun is the force of gravity. Another application of the law of universal gravitation was Newton's exploration of the tides. Newton was highly honoured by his countrymen and in 1703 he was elected President of the Royal Society.

2. Заповніть пропуски відповідною активною або пасивною формою дієслова та перекладіть речення українською:
