

Intermediate/Advanced Jewelry Research and Share Project

Find a culturally significant piece of jewelry to share with the class. This will be short and sweet. Think culturally, like an Egyptian Cartouche.

This is a solo project, but if you want to work with someone you will need to make two different presentations, but can present them together and research them together.

Include:

- At least 10 different examples of the jewelry items

- Explanation of history, meaning, and how or why it is still used today

- What drew you to this type of jewelry

- If you were going to 'make' one how would you do it?

You will share a slideshow of the information with the class. These will be brief, about 3-5 minutes. Low-key!
