

MASTERING PREP

Do not send mp3's. Wav files only.

Please send all files in the same sample rate/bit depth that they were recorded in.

Make sure to remove final limiter and send either photo or preset file as well as ensure there's enough headroom so there's no chance of peaking on export.

Include 1-2 songs that you would like us to use as a reference dynamically/sonically.

Please include a text file with song titles with proper punctuation and track order as well as side information for vinyl mastering if needed.
