THE 10/25/2025 UPDATE.

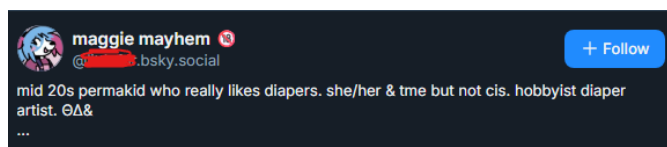

Hi! Its kitty, the maker of this doc. I wanted to look at maggies account one more time just for good measure but ive found the worst things yet.

Maggie has been liking / replying / following pedophilic ABDL accounts, some are just diaperfur pictures, some of it is actual cub art, lycos also a proshipper but those other things really outweigh that.

(cub is a term for furry CSEM basically.)

If you dont know, cadet is an infamous csem artist in the homestuck community, known for drawing incestual/pedophilic art of toddlers

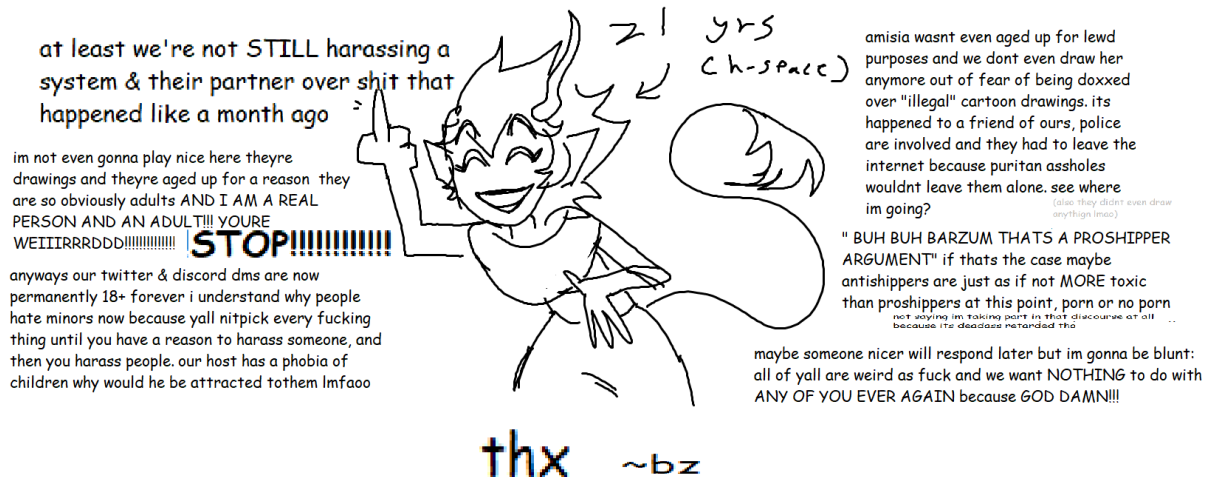

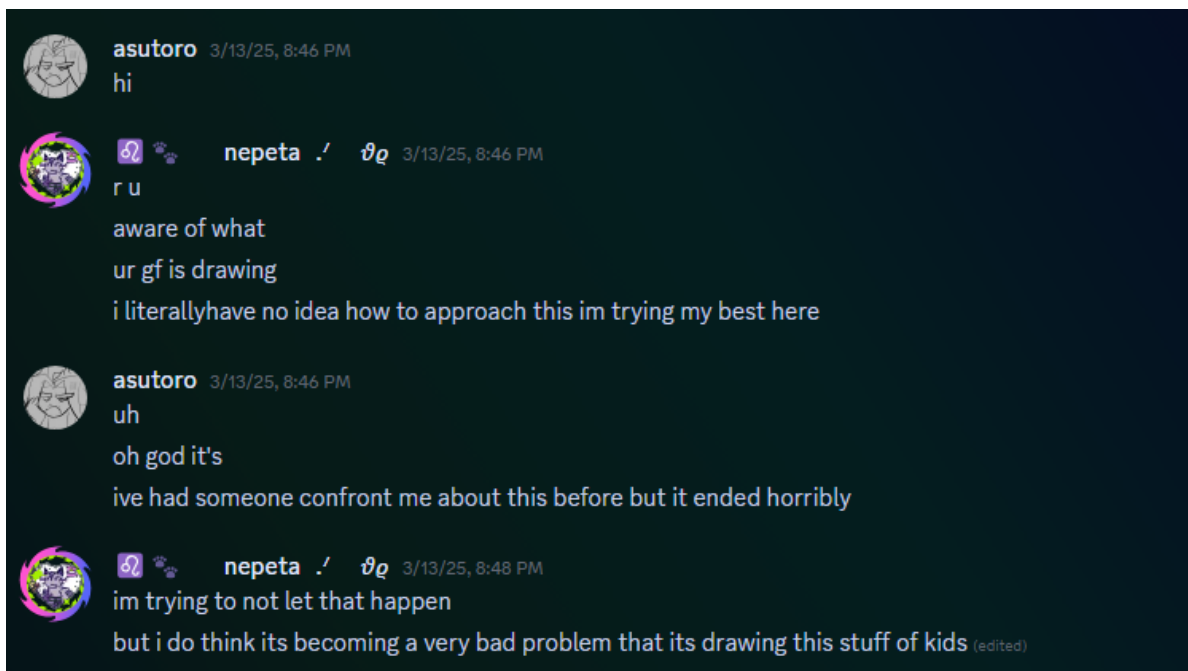

The same purple cat character is posted to look like a toddler

Im very sick of what this piece of shit has been looking at.
Maggie is a weirdo and I'm not really scared of saying this
anymore. i get theyre going though a hard time but theres no
excuse to this This doc will not receive updates anymore unless
if something important has happened, since im a minor and
looking at this shit has ruined my health but thats my fault here
lol
Ok bye kitty out

This is lycopods attempt at harassment i guess LOL, i was 13 at the time and apparently this is ok to send after i concerned for them

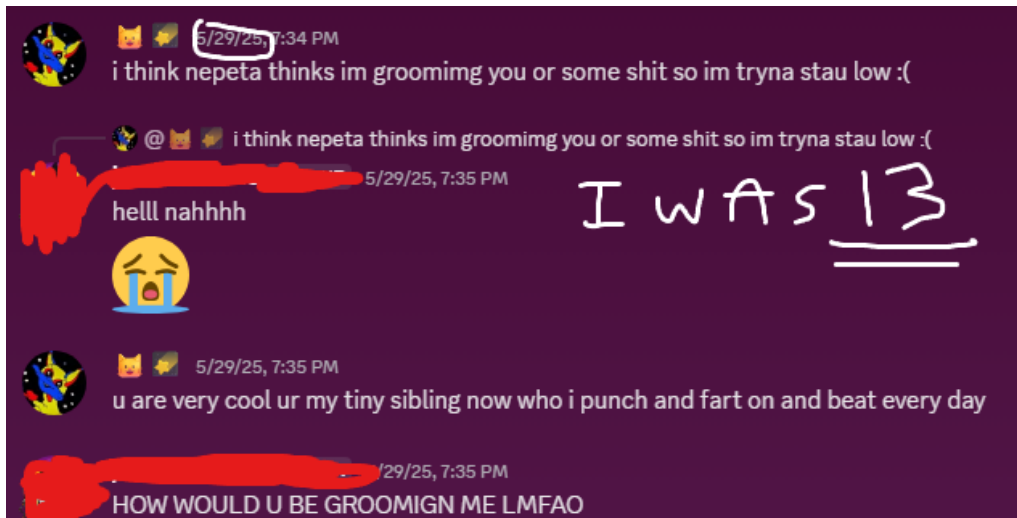

COMPARE THIS TO HOW I WAS TALKING TO THEIR BF ABOUT THIS (old screenshot)

Lycopods claims to have a “phobia of minors” but has willingly talked to an (at the time) 13 year old. I asked the kid for their chats and there was a lot !

I DIDNT EVEN START OUR CONVOS HALF THE TIME BTW
THEY WOULD JUST DM ME

Heres lycopod lying about me, i was literally 13 btw
and i most likely never even said this about them
other than for being weirded out they draw nsfw of
minors

amisia grabbing me pulling me into her lap against her chest and purring really loudly so i can feel the warmth and her love with every beat of her heart.... send tweet

Reposts and Comments under commission work , this “aged up” design only makes her boobs larger and sometimes her sexual proportions larger... i wonder why
